Absolution Gap is not without its faults, chief among them the sudden hurtle to the end in the last few chapters, which seems rather abrupt after five hundred pages of leisurely, atmospheric prose. Overall, though, an excellent final volume in the story of the Inhibitors. Reynolds has clearly hit his stride now, and it'll be interesting to see where he goes from here. Review by John Toon ...

In the epic conclusion of the Revelation Space trilogy, veteran Clavain and his desperate companions seek refuge on a remote moon, light-years away from the ancient killing machines wreaking havoc on the universe in an attempt to destroy all human life, only to discover that to defeat this horrific enemy, they must forge an uneasy alliance with an even more deadly "ally." Reprint.

"Revelation Space" and "Redemption Ark" have been hailed as "the best of the new breed of space opera." Now "Absolution Gap" concludes Reynolds' epic

Elysium Fire is a smoldering tale of murderers, secret cultists, tampered memories, and unthinkable power, of bottomless corruption and overpowering idealism from the king of modern space opera. Ten thousand city-state habitats orbit the planet Yellowstone, forming a near-perfect democratic human paradise. But even utopia needs a police force. For the citizens of the Glitter Band that organization is Panoply, and the prefects are its operatives. Prefect Tom Dreyfus has a new emergency on his hands. Across the habitats and their hundred million citizens, people are dying suddenly and randomly, victims of a bizarre and

unprecedented malfunction of their neural implants. And these "melters" leave no clues behind as to the cause of their deaths... As panic rises in the populace, a charismatic figure is sowing insurrection, convincing a small but growing number of habitats to break away from the Glitter Band and form their own independent colonies. Alastair Reynolds pushes the boundaries of science fiction and “ confirms his place among the leaders of the hard-science space-opera renaissance ” (Publishers Weekly) in this novel in his Revelation Space universe. Late in

the twenty-sixth century, the human race has advanced enough to accidentally trigger the Inhibitors—alien killing machines designed to detect intelligent life and destroy it. The only hope for humanity lies in the recovery of a secret cache of doomsday weapons—and a renegade named Clavain who is determined to find them. But other factions want the weapons for their own purposes—and the weapons themselves have another agenda altogether...

A collection of eight short stories and novellas in the dark and turbulent world of Alastair Reynolds' Revelation Space universe. Centuries from now, solidarity stretches thin as

humanity spreads past the solar system and to the nearest stars. Technology has produced powerful new tools-but lethal risk will always accompany great advancement. And without foresight, opposing groups may fracture multiple worlds. Between the Demarchists and the Conjoiners, the basic right to expand human intelligence-beyond its natural limits-has become a war-worthy cause. Only vast lighthugger starships bind these squabbling colonies together, manned by the panicky and paranoid Ultras. And the hyperpigs just try to keep their heads down. The rich get richer. And everyone tries not to think about the worrying number of extinct alien civilizations turning up on the

outer reaches of settled space...because who's to say that humanity won't be next?

Part science fiction thriller, part interstellar adventure, and part noir crime, *Century Rain* is an astonishing international bestseller of "blistering powers and style" (SF Revu). Three hundred years from now, Earth has been rendered uninhabitable due to the technological catastrophe known as the Nanocaust. Archaeologist Verity Auger specializes in the exploration of its surviving landscape. Now, her expertise is required for a far greater purpose. Something astonishing has been discovered at the far end of a wormhole: a mid-20th-century version of Earth, preserved like a

fly in amber. Somewhere on this alternate planet is a device capable of destroying both worlds at either end of the wormhole. And Verity must find the device, and the man who plans to activate it, before it's too late -- for the past and the future of two worlds. Century Rain is a jaw-droppingly good SF thriller, packed with pace, adventure, brilliant storytelling and with twists that will keep you guessing to the end.

of her nuclear-powered ship, the Rockhopper, push ice. They mine comets. And they're good at it. The Rockhopper is nearing the end of its current mission cycle, and everyone is desperate for some much-needed R & R, when startling news arrives from Saturn: Janus, one of Saturn's ice moons, has inexplicably left its natural orbit and is now heading out of the solar system at high speed. As layers of camouflage fall away, it becomes clear that Janus was never a moon in the first place. It's some kind of machine -- and it is now headed toward a fuzzily glimpsed artifact 260 light-years away. The Rockhopper is the only ship anywhere near Janus, and Bella Lind is ordered to shadow it for the few vital days before it

Return to the dazzling world of Revelation Space with this British Science Fiction Award-winning space opera about a young man hell-bent on revenge on the surface of a twisted, disease-corrupted planet. The once-utopian Chasm City -- a domed human settlement on an otherwise inhospitable planet -- has been overrun by a virus known as the Melding Plague, capable of infecting any body, organic or computerized. Now, with the entire city corrupted -- from the people

to the very buildings they inhabit -- only the most wretched sort of existence remains. For security operative Tanner Mirabel, it is the landscape of nightmares through which he searches for a lowlife postmortal killer. But the stakes are raised when his search brings him face to face with a centuries-old atrocity that history would rather forget. and Raule are rebels on the run, with little in common except being on the losing side of a hard-fought war. Gwynn is a gunslinger from the north, a loner, a survivor . . . a killer. Raule is a wandering surgeon, a healer who still believes in just—and lost—causes. Bound by a desire to escape the ghosts of the past, together they flee to the teeming city of Ashamoil, where Raule plies her trade among the desperate and destitute, and Gwynn becomes bodyguard and assassin for the household of a corrupt magnate. There, in the saving and taking of lives, they find themselves immersed in a world where art infects life, dream and waking fuse, and splendid and frightening miracles begin to bloom . . . “ The
