Knowledge Management and Organizational Memories presents models, methods, and techniques for building, managing and using corporate memories. These models incorporate knowledge bases, ontologies, documents, FAQs, workflow systems, case-based reasoning systems, multi-agent systems, and CSCW. The book is divided into five parts: methods; knowledge-based approaches; ontologies and documents; case-based reasoning approaches; and distributed and collaborative approaches.

Evolution of Information Technology in Educational Management As the editors of this volume we are very happy to publish a selection of the papers that were presented at the eighth Conference of Working Group 3.7 of the International Federation for Information Processing which was held in July 2008. The focus of Working Group 3.7 is on ITEM: Information Technology in Educational Management (for more information, please visit our website <http://item.wceruw.org/>), and the theme of its 2008 conference was on the Evolution of Information Technology in

Where To Download Abstract Key Words Management O A Dozen Common Mistakes

Educational Management. Our Working Group started its activities (officially we were not an IFIP Working Group at that time) in 1994 in Israel, so it made sense to look at how ITEM has evolved over the years and to reflect on what its future may be. The conference took place in Darwin (northern Australia) which even during the Australian winter is a very pleasant location for having a conference. The town of Darwin was given its name by the Captain of the Beagle (the ship on which Darwin travelled when he made the investigations on which he based his Theory of Evolution) who came to the area and named the town after the giant of science he admired.

P2P, Grid, Cloud and Internet computing technologies have been very fast established as breakthrough paradigms for solving complex problems by enabling aggregation and sharing of an increasing variety of distributed computational resources at large scale. The aim of this volume is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to P2P, Grid, Cloud and Internet computing as well as to reveal synergies among such large scale computing paradigms. This proceedings volume presents the results of the 11th International Conference on P2P, Parallel, Grid, Cloud And Internet Computing (3PGCIC-2016), held November 5-7, 2016, at Soonchunhyang University, Asan, Korea
