With the decision to provide of a scholarly edition of the Works of John Wesley in the 1950s, Methodist Studies emerged as a fresh academic venture. Building on the foundation laid by Frank Baker, Albert Outler, and other pioneers of the discipline, this handbook provides an overview of the best current scholarship in the field. The forty-two included essays are representative of the voices of a new generation of international scholars, summarising and expanding on topical research, and considering where their work may lead Methodist Studies in the future. Thematically ordered, the handbook provides

new insights into the founders, history, structures, and theology of Methodism, and into ongoing developments in the practice and experience of the contemporary movement. Key themes explored include worship forms, mission, ecumenism, and engagement with contemporary ethical and political debate.

The Hidden Ivies focuses on liberal arts colleges and universities that are comparable quality to the Ivies. Based on surveys and interviews with students as well as college presidents, deans of faculty, and other administrators, The Hidden Ivies presents an insider perspective of thirty leading institutions of exceptional merit. These colleges and universities provide an outstanding educational experience for the gifted college-bound student and provide the foundations for life after graduation.

"Wesley and Methodist Studies " ("WMS") publishes peer-reviewed essays that examine the life and work of John and Charles Wesley, their contemporaries (proponents or opponents) in the eighteenth-century Evangelical Revival, their historical and theological antecedents, their successors in the Wesleyan tradition, and studies of the Wesleyan and Evangelical traditions today. Its primary historical scope is the eighteenth century to the present; however, "WMS" will publish essays that explore the historical and theological antecedents of the Wesleys (including work on Samuel and Susanna Wesley), Methodism, and the Evangelical Revival. "WMS" has a dual and broad focus on both history and theology. Its aim is to present significant scholarly contributions that shed light on historical and theological understandings of Methodism broadly conceived. Essays within the thematic scope of "WMS" from the disciplinary perspectives of literature, philosophy, education and cognate disciplines are welcome. "WMS" is a collaborative project of the Manchester Wesley Research Centre and The Oxford Centre for Methodism and Church History, Oxford Brookes University.

More than 12,000 years ago, in one of the greatest triumphs of prehistory, humans colonized North America, a continent that was then truly a new world. Just when and how they did so has been one of the most perplexing and controversial questions in archaeology. This dazzling, cutting-edge synthesis, written for a wide audience by an archaeologist who has long been at the center of these debates, tells the scientific story of the first Americans: where they came from, when they arrived, and how they met the challenges of moving across the vast, unknown landscapes of Ice Age North America. David J. Meltzer pulls together the latest ideas from archaeology, geology, linguistics, skeletal biology, genetics, and other fields to trace the breakthroughs that have revolutionized our understanding in recent years. Among many other topics, he explores disputes over the hemisphere's oldest and most controversial sites and considers how the first Americans coped with changing global climates. He also confronts some radical claims: that the Americas were colonized from Europe or that a crashing comet obliterated the

How our colleges and universities can respond to the changing hopes and needs of society In recent decades, cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society. In this landmark book, Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty-first century. Prior to this century, most psychologists thought that creativity, empathy, resilience, conscientiousness, and most personality traits were largely fixed by early childhood. What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond. Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life. How prepared are educators to cultivate these qualities of mind and behavior? What do they need to learn to capitalize on the possibilities? Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods? What can be done to hasten the process of innovation and application? In providing answers to these questions, Bok identifies the hurdles to institutional change, proposes sensible reforms, and demonstrates how our colleges can help students lead more successful, productive, and meaningful lives.

Getting into college is a national obsession among high school students and their parents, and it's only getting worse. Each year, there are more applications and tougher admissions standards at competitive schools. In a tight job market, the stakes are higher than ever. Businesses, books, and programs exist to help students win acceptance to top schools, but why not go to the real source – recent high school graduates who survived the college admissions process. In *How to Survive Getting Into College*, hundreds of students share their hard-won wisdom, thoughts, strategies, struggles, and even failures. Filled with tips, tricks, humor, and horror stories, as well as practical advice on applications, interviews, and financial aid, the book is a lifeline for high school juniors and seniors.
