Frustrated by the overwhelming nature of

Flash? Want to get up to speed with the program fast so you can concentrate on your animation? Need to solve problems quickly to get work done to time and to budget? Then 'How to Cheat in Flash' is for you! This

book is different from the
rest because it shows you,
step by step, how to work
from the problem to the
solution when creating Flash
animations, from the
viewpoint of an animator who
has been commissioned to

create a job and is working
to a deadline. It is task
orientated; every example
shows real life commercial
work. So, it's not so much a
case of 'what does this
filter/tool/option do?', as
'this is the task I've been

set - how do I achieve it?'
The solution may involve a
variety of tools and
techniques; it may take many
steps to complete, or only a
few. The free CD-Rom
includes all the files you
need to put your skills into

practice as you read, and much more! It's an accessible (conversational in style), practical book and CD package which also provides artistic inspiration, a goldmine of timesaving practical tips,

tricks and step-by-step
workthroughs. You will
wonder how you survived
without it.
