An extensive history of the American Museum of Natural History and Hayden Planetarium, featuring a cast of colorful characters. The American Museum of Natural History is one of New York City's most beloved institutions, and one of the largest, most celebrated museums in the world. Since 1869, generations of New Yorkers and tourists of all ages have been educated and entertained here. Located across from Central Park, the sprawling structure, spanning four city blocks, is a fascinating conglomeration of many buildings of diverse architectural styles built over a period of 150 years. The first book to tell the history of the museum from the point of view of these buildings, including the planned Gilder Center, *The American Museum of Natural History and How It Got That Way* contextualizes them within New York and American history and the history of science. Part II, "The Heavens in the Attic," is the first detailed history of the Hayden Planetarium, from the museum's earliest astronomy exhibits, to Clyde Fisher and the original planetarium, to Neil deGrasse Tyson and the Rose Center for Earth and Space, and it features a photographic tour through the original Hayden Planetarium. Author Colin Davey spent much of his childhood literally and figuratively lost in the museum's labyrinthine hallways. The museum grew in fits and starts according to the vicissitudes of backroom deals, personal agendas, two world wars, the Great Depression, and the Cold War. Chronicling its evolution from the selection of a desolate, rocky, hilly, swampy site, known as Manhattan Square to the present day, the book includes some of the most important and colorful characters in the city's history, including the notoriously corrupt and powerful "Boss" Tweed,

“Father of New York City” Andrew Haswell Green, and twentieth-century powerbroker and master builder Robert Moses; museum presidents Morris K. Jesup, Henry Fairfield Osborn, and Ellen Futter; and American presidents, polar and African explorers, dinosaur hunters, and German rocket scientists. Features a new preface by the author and a new foreword by Neil deGrasse Tyson. “This is, in many ways, a particularly American story, and anyone interested in history or museums will find this a very satisfying read. Author Colin Davey had a life-long love affair with the museum, growing up in New York and spending many, many hours happily lost in the museum collections, and that shines through in his writing as does his fine, in-depth research. Plenty of excellent graphics and photographs support this fascinating history.”

—Seattle Book Review

Illustrations to color and easy-to-follow text introduce children to twenty-three items found in the American Museum of Natural History's permanent collection.

Providing readers with a rare glimpse into one of the largest natural-science libraries in the Western Hemisphere, this fascinating collection of 40 essays from the American Museum of Natural History's top experts discuss the library's seldom-seen, fully illustrated scientific works.

Created in partnership with the world-renowned American Museum of Natural History, this beautiful, informative card deck captures, in pictures and words, 100 of the museum's most important artifacts, specimens, and exhibits—from a fossilized dinosaur's nest to the largest blue star sapphire in the world (563 carats!). The American Museum of Natural History (AMNH) is one of the world's preeminent natural history museums and research institutions. Its collections

contain more than 32 million specimens of plants, humans, animals, fossils, minerals, rocks, meteorites, and cultural artifacts. Now, for the first time, this acclaimed collection is represented in a stunning and informative card deck featuring 100 treasures, hand-selected by the museum's curators, that encompass the most fascinating, iconic, and wide-ranging of the museum's artifacts. The card deck covers each of the museum's major areas of exhibition, including Birds, Reptiles, and Amphibians; Earth and Planetary Science; Fossils; Human Origins and Culture; Mammals; Biodiversity and the Environmental; and the Hayden Planetarium. Some of the 100 objects include the Cape York Meteorite, discovered in Greenland in 1894; the Haida Canoe, built in 1878 by the Indians of the Pacific Northwest and carved from the trunk of a large cedar tree; the Blue Whale, a fiberglass replica of a 94-foot whale caught in 1925 off South George Island and the Warren Mastodon skeleton, the first complete mastodon skeleton discovered in the United States. Each card presents a full-frame photograph of the object on the front and a 200-word description on the back that tells of the origin and age of the object and its scientific and historic significance.
