Students will learn the science of life in this colorful textbook that displays an engaging design sure to grab their attention from the very first day. Each chapter of Life Science includes well-researched material written at grade level, colorful images to reinforce text content, boxes with fun facts and helpful explanations, a list of key terms, a chapter summary, thought-provoking review questions, and extra questions to prepare students for standardized tests. Students will study cell biology, genetics, the history of life, microbiology, botany, zoology, ecology, and human anatomy and physiology, all within a biblical framework. -

Beginning with an introduction to why we do science, the Physical Science Student Text, 5th ed., gradually builds the student's understanding of physics concepts in a logical sequence. Beginning with classical mechanics, the text progresses through work and energy, wave phenomena, electricity and magnetism, and light and optics. These transition naturally into the chemistry topics, beginning with the atomic model, then to elements and compounds, chemical reactions, and finishing with solutions, and acids, basis, and salts. Every chapter shows by example why the subject matter is relevant to a Christian worldview of science. - Publisher.

The Science 3 Student Text provides age-appropriate scientific information through text, diagrams, and charts, as well as annotated photographs and illustrations. Special interest boxes occur throughout the book and Quick Check sections are included in all text lessons. The Student Text also contains instructions for experiments, activities, and projects. The last page of each chapter provides key terms and concepts as well a brief writing exercise that applies higher-level thinking skills. A glossary and index are located at the end of the book. The Science 3 Teacher's Edition, 3rd ed. contains 94 lessons grouped in five units. Each unit consists of two or three interrelated chapters. Most lessons include additional background information, cross-curricular links, and science activities. The Teacher's Edition also includes useful information about science process skills, the management of activities, and grading. Reproducible pages, a materials list, rubrics for assessing Activity and Explorations lessons, and the alignment of Science 3 with national standards are located in the back of the Teacher's Edition. - Publisher.

The Visual Packet contains useful illustrations and diagrams that can be reproduced for overhead projector use. Grade 7.

What does the white evangelical want? In our moment of crisis and rage, this question is everywhere. Scholars ask from where its desires emerged, pundits divine its political future, and the public asks how we lapsed into social chaos. For their part, white evangelicals feel misunderstood while failing to see the direction of their ambitions. We must interrogate its aims not only through its past or current trends but also through the various fantasies by which it rejects and enlivens reality. Against traces five zones of opposition: future, knowledge, sexuality, reality, and society. If climate change is the greatest threat civilization has ever faced, then a faith aiding collapse must face analysis. If it swims in assured forgiveness, it feels no shame for its sins against humanity. If it wants a king, it threatens democracy. If it veils xenophobia, it shall be ever more cruel. In a critical and accessible history of odd ideas, DeLay chronicles the past and sketches its troubling future. It might die, but what's certain is that a faith built on nostalgia and supremacy won't moderate. We live in dangerous times, so let us consider its justifications, turmoil, appetite, and catastrophe.
