This means that if a city has 5 Population and sources of local happiness adding up to 8 Happiness, the actual amount that will be contributed to your empire's Happiness will be 5, not 8. The logic behind this distinction is sound: Sources of Local Happiness are the most common entertainment buildings (Circus, Colosseum, etc.), which provide shallow, low-level amusement for the masses.

"How the insights of an 18th century economist can help us live better in the 21st century. Adam Smith became famous for The Wealth of Nations, but the Scottish economist also cared deeply about our moral choices and behavior--the subjects of his other brilliant book, The Theory of Moral Sentiments (1759). Now, economist Russ Roberts shows why Smith's neglected work might be the greatest self-help book you've never read. Roberts explores Smith's unique and fascinating approach to fundamental questions such as- 'What is the deepest source of human satisfaction?' - Why do we sometimes swing between selfishness and altruism?' - What's the connection between morality and happiness? Drawing on current events, literature, history, and pop culture, Roberts offers an accessible and thought-provoking view of human behavior through the lenses of behavioral economics and philosophy" --

A huge bestseller in Europe, Frederic Lenoir ' s Happiness is an exciting journey that examines how history ' s greatest philosophers and religious figures have answered life ' s most fundamental question: What is happiness and how do I achieve it? From the ancient Greeks on—from Aristotle, Plato, and Chuang Tzu to the Buddha, Jesus, and Muhammad; from Voltaire, Spinoza, and Schopenhauer to Kant, Freud, and even modern neuroscientists—Lenoir considers the idea that true and lasting happiness is indeed possible. In clear language, Lenoir concisely surveys what the greatest thinkers of all time have had to say on the subject, and, with charming prose, raises provocative questions: · Do we have a duty to be happy? · Is there a connection between individual and collective happiness? · Is happiness contagious? · Is there a difference between pleasure and happiness? · Can unhappiness and happiness coexist? · Does our happiness depend on our luck? Understanding how civilization ' s best minds have answered those questions, Lenoir suggests, not only makes for a fascinating reading experience, but also provides a way for us to see us how happiness, that most elusive of feelings, is attainable in our own lives.

Civilization and Its Discontents is considered Freud's most brilliant work. In it he states his views on the broad question of man's place in the world. It has been praised, dissected, lambasted, interpreted, and reinterpreted. Originally published in 1930, it seeks to answer several questions fundamental to human society and its organization—What influences led to the creation of civilization? Why and how did it come to be? What determines civilization ' s trajectory? This process, argues Freud, is an inherent quality of civilization that instills perpetual feelings of discontent in its citizens. Freud's theme is that what works for civilization doesn't necessarily work for man. Man, by nature aggressive and egotistical, seeks self-satisfaction.

Ming, born in a bleak outpost of Sichuan province, finds an unexpected glimpse of the world beyond when she when she meets a talking monkey with golden eyes and supernatural abilities--the immortal Monkey King, with whom Ming's destiny is inextricably intertwined. Determined to become a writer, Ming finds her way to New York, but she becomes employed by a by a crime ring to make ends meet and returns to China on the lam. Hope arrives in the form of her American friend Zoe. Together, they travel to the village of Ming's birth, where the clouds writhle like phantoms and the rain never stops, and where Ming and Zoe join forces with a certain down-and-out immortal who has an ambitious plan to save the world from capitalism run amok. When a nation of tycoons and financiers suddenly and inexplicably decide that the key to happiness lies in sharing one's wealth and pursuing a contemplative life, nobody suspects the newly formed tech company run by Ming, Zoe, and William Sun. Hyper-capitalist China rapidly becomes a paradise for artists, thinkers, and lovers--a rollicking playground where the air is clean and the strangest words you can hear are, "I can't afford it!" But it's a short-lived Xanadu once human nature begins to intervene. In Ms. Ming's Guide to Civilization, as in life and politics, every action provokes an equal and opposite reaction.

"This book is a tour de force." -- Adam Grant, New York Times bestselling author of Give and Take A revolutionary new history of humankind through the prism of work by leading anthropologist James Suzman Work defines who we are. It determines our status, and dictates how, where, and with whom we spend most of our time. It mediates our self-worth and molds our values. But are we hard-wired to work as hard as we do? Did our Stone Age ancestors also live to work and work to live? And what might a world where work plays a far less important role look like? To answer these questions, James Suzman charts a grand history of "work" from the origins of life on Earth to our ever more automated present, challenging some of our deepest assumptions about who we are. Drawing insights from anthropology, archaeology, evolutionary biology, zoology, physics, and economics, he shows that while we have evolved to find joy meaning and purpose in work, for most of human history our ancestors worked far less and thought very differently about work than we do now. He demonstrates how our contemporary culture of work has its roots in the agricultural revolution ten thousand years ago. Our sense of what it is to be human was transformed by the transition from foraging to food production, and, later, our migration to cities. Since then, our relationships with one another and with our environments, and even our sense of the passage of time, have not been the same. Arguing that we are in the midst of a similarly transformative point in history, Suzman shows how automation might revolutionize our relationship with work and in doing so usher in a more sustainable and equitable future for our world and ourselves.

Exploring the modern approach to the economics of happiness, which came about with the Easterlin Paradox, this book analyses and assesses the idea that as a country gets richer the happiness of its citizens remains the same. The book moves through three distinct pillars of study in the field: first analysing the historical and philosophical foundations of the debate; then the methodological and measurements issues and their political implications; and finally empirical applications and discussion about what determines a happy life.

In this book, I show, both men and women, that you can lead a happier life, a more peaceful life, than you think. The unpalatable truth is that Western civilization creates enormous stress. From morning to night, from birth to death, you are expected to and you expect to perform. Accumulating stress over many years has a major deleterious effect on your mental, emotional, sexual and physical health and happiness.
