A new, full-colour textbook matched exactly to the syllabus, featuring: - Data-based structured questions - Multiple choice questions at the end of every chapter - Student activities throughout This title is endorsed by Cambridge International Examinations

Specifically written for the O Level Commerce syllabus.

A History of Western Political Thought is an energetic and lucid account of the most important political thinkers and the enduring themes of the last two and a half millennia. Written with students of the history of political thought in mind, the book: \* traces the development of political thought from Ancient Greece to the late twentieth century \* focuses on individual thinkers and texts \* includes 40 biographies of key political thinkers \* offers original views of theorists and highlights those which may have been unjustly neglected \* develops the wider

themes of political thought and the relations between thinkers over time.

This report discusses how Sri Lanka can prepare for the challenges of an aging population. By 2050, Sri Lanka will go through an unprecedented demographic transition into an aging population at a lower level of per capita income than other aging economies. This publication analyzes the living arrangements and incomes of the over-60s in Sri Lanka, and patterns and trends of aging. It identifies the challenges the country is likely to face and suggests how policy makers can tackle them.

Get your best grades with this Cambridge International AS and A Level Geography Revision Guide. Manage your own revision with step-by-step support from experienced examiners Garrett Nagle and Paul Guinness Use specific case studies to improve your knowledge of geographical patterns, processes and changes Get the top marks by applying geographical terms accurately with the help of definitions and key words Use the Revision Guide to prepare for the big day: Plan and pace your revision with the revision planner Use the expert tips to clarify key points Avoid making typical mistakes with expert advice Test yourself with end-of-topic questions and answers and tick off each topic as you complete it Practise your exam skills with exam-style AS and A2 questions The Revision Guide also has: Coverage of the whole syllabus, including all 8 options An international focus, including examples and case studies from around the world. Also available: Cambridge International A and AS Level Geography textbook (ISBN: 9781444123166) by Garrett Nagle and Paul Guinness and endorsed by University of Cambridge International Examinations. This title has not been through the Cambridge endorsement process.

Independent, scientifically based, integrated, policy-relevant analysis of current and emerging energy issues for specialists and policymakers in academia, industry, government.

Since the 'Great Debate' on education was launched in 1976, the need to bring greater coherence to the secondary curriculum has been generally recognized but to be effective, a new curriculum design must be implemented, and the process of planned educational change must be understood. Regenerating the Curriculum traces the social and political climate which led to a rejection of piecemeal change, and examines the implications of school-based development of the whole curriculum for national projects, for in-service training, and for the management of change processes in the school. It considers the need for new professional styles for head and teacher, and the role of external change agencies, and looks at the influence on the learning process of a unified curriculum based on a selection from the culture. Finally, the political context of curriculum change is studied at national, regional and local levels along with the emergent concept of accountability and its implication for authority structures in education. This book sets out the possible patterns of change in schools, local authorities and national policies, and suggests a number of strategies for regenerating the curriculum in the climate of evaluation and innovation that lies ahead.

This fresh set of resources for Cambridge IGCSE Sociology syllabus 0495 (and Cambridge O Level Sociology syllabus 2251) is carefully crafted to match and support the revised syllabus for first examination in 2016. Written in clear and accessible language, the Coursebook provides comprehensive coverage of the syllabus in a visually-stimulating format. Key sociological research combined with case studies and thought provoking questions help in understanding concepts. Features such as Key terms and Revision checklists further reinforce

learning and understanding of core subject areas. Engaging activities help in applying knowledge in various contexts and building interpretation, analytical and evaluation skills. The book provides complete exam support with each chapter culminating in exam-style questions and a further chapter dedicated to revision, and examination skills and practice. A Teachers CD-ROM is also available.

An improved understanding of the interactions between nanoparticles and plant retorts, including their uptake, localization, and activity, could revolutionize crop production through increased disease resistance, nutrient utilization, and crop yield. This may further impact other agricultural and industrial processes that are based on plant crops. This two-volume book analyses the key processes involved in the nanoparticle delivery to plants and details the interactions between plants and nanomaterials. Potential plant nanotechnology applications for enhanced nutrient uptake, increased crop productivity and plant disease management are evaluated with careful consideration regarding safe use, social acceptance and ecological impact of these technologies. *Plant Nanobionics: Volume 1, Advances in the Understanding of Nanomaterials Research and Applications* begins the discussion of nanotechnology applications in plants with the characterization and nanosynthesis of various microbes and covers the mechanisms and etiology of nanostructure function in microbial cells. It focuses on the potential alteration of plant production systems through the controlled release of agrochemicals and targeted delivery of biomolecules. Industrial and medical applications are included. Volume 2 continues this discussion with a focus on biosynthesis and toxicity.
