Presents 16 sessions and activities for children to practice recognizing feelings and physical reactions to anxiety in different situations.

Treatment manual describing a 16-session program for the treatment of anxiety disorders, specifically generalized anxiety disorder, social phobia, and separation anxiety disorder, in children and young adolescents. Treatment's goal is to teach children to recognize signs of unwanted anxious arousal and to follow that recognition with the use of anxiety management strategies.

Kendall and Braswell have designed and developed specific procedures that can improve children's self-control and reduce their impulsivity. In this second edition, the authors both expand and focus the application of their program, involving parents and teachers to a greater extent, making greater use of hands-on workbook materials, and adapting and implementing procedures for children with a wide range of behavior problems linked to impulsivity. The present edition also provides, in greater detail, descriptions of treatment strategies, in-session therapy materials, case examples, and illustrative transcripts. This book will be of great value to child and family psychologists, social workers, educators, and psychiatrists, as well as parents, pediatricians, classroom teachers, and others who frequently encounter impulsive children. This book also serves as an excellent ancillary text for courses in clinical child psychology, school psychology, educational interventions, applied

developmental psychology, and other mental health related classes.

"A guide for school-based professionals"--cover.

With over 10% of all children meeting the criteria for an anxiety disorder, these disorders are among the most common psychiatric problems experienced by schoolage kids, and can significantly interfere with their family and peer relationships and their performance at school.

Presents sessions, lessons and take-home activities for teens with anxiety, in order to examine the emotions and physical feelings that occur in different situations.

This practical manual presents a cognitive-behavioral treatment program that has been proven effective in eliminating or alleviating OCD symptoms in children across a broad range of ages and aptitudes. Building upon and expanding their internationally acclaimed HOW I RAN OCD OFF MY LAND, the authors provide an empirically grounded guide to assessment, treatment planning, and skills-based intervention. Clinicians are taken through the four stages of treatment--psychoeducation, cognitive training, mapping OCD, and graded exposure and response prevention--in 13 to 20 clearly structured treatment sessions. The book is enriched by sample dialogues, "clinical pearls" drawn from the authors' own experience, and appendices featuring reproducible rating scales, patient handouts, and tips and resources for parents. PHOTOCOPY RIGHTS: The publisher grants to individual purchasers nonassignable permission to reproduce handouts and forms in this book for clinical use with their clients.
