Introduce students to the essentials of cost accounting using the clear, concise and practical approach in PRINCIPLES OF COST ACCOUNTING, 17E. The book's unique 10-chapter format provides a thorough understanding of cost concepts, cost behavior, and cost accounting techniques as applied to manufacturing and service businesses. The authors ensure students master fundamentals before progressing to more complex topics. Students begin with job order costing, and advance to process costing before delving into specialized topics, such as budgeting, standard costing and variance analysis, costing for service businesses, and cost analysis for management decisions. The book introduces concepts in small, manageable sections that are immediately reinforced with proven questions, demonstration problems, exercises, and self-study quizzes. Updated examples and current data keep the content relevant to today's times. Students learn how to determine the costs of products and services and set selling prices. Students also discover how to bid on products and analyze the relative profitability of products and services. In addition, the book teaches how to measure the performance of managers, design an accounting system, and use accounting to further organizational goals. Count on PRINCIPLES OF COST ACCOUNTING, 17E for the most logical, relevant approach to your cost accounting course. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This text provides students with a thorough, but abbreviated, understanding of concepts, behavior, and accounting techniques applicable to manufacturing cost systems. It is designed for the brief cost accounting course found in career and community colleges.

Introduction to Managerial Accounting, 4/e by Brewer/Garrison/Noreen is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. However, this is not simply a briefer book with chapters removed; B/G/N has been rethought and retooled to meet the needs of the market. B/G/N 4/e is a more accessible, yet thoroughly student-friendly text that satisfies the basic needs of the managerial accounting student without unnecessary depth on advanced topics associated with the follow-up course: cost accounting/cost management. Faculty and students alike will find this new edition has retained the hallmark features of the Garrison brand: author-written supplements, excellent readability, terrific examples, and balanced end-of-chapter material.

This text offers a presentation of the mathematics required to tackle problems in economic analysis. After a review of the fundamentals of sets, numbers, and functions, it covers limits and continuity, the calculus of functions of one variable, linear algebra, multivariate calculus, and dynamics.
