There was a firm called Marion-Craftsman Tool Company and the name "craftsman" attracted Barrows' attention. As a result Sears bought the rights to use the name "craftsman" for its products for \$500. Early customers of Craftsman tools were farmers who preferred to build their homes, barns, furniture etc. with their own hands.

In this book, the authors of the 20-year best-selling classic Security in Computing take a fresh, contemporary, and powerfully relevant new approach to introducing

computer security. Organised around attacks and mitigations, the Pfleegers' new *Analyzing Computer Security* will attract students' attention by building on the high-profile security failures they may have already encountered in the popular media. Each section starts with an attack description. Next, the authors explain the vulnerabilities that have allowed this attack to occur. With this foundation in place, they systematically present today's most effective countermeasures for blocking or weakening the attack. One step at a time, students progress from attack/problem/harm to solution/protection/mitigation, building the powerful real-world problem solving skills they need to succeed as information security professionals. *Analyzing Computer Security* addresses crucial contemporary computer security themes throughout, including effective security management and risk analysis; economics and quantitative study; privacy, ethics, and laws; and the use of overlapping controls. The authors also present significant new material on computer forensics, insiders, human factors, and trust.

Following the familiar, easy-to-use at a Glance format, and in full-colour, this brand new title provides an accessible introduction and revision aid for medical students and junior doctors. Reflecting the increased profile of Emergency Medicine in clinical practice and the medical school curriculum, *Adult Emergency Medicine at a Glance* provides a user-friendly overview of the key subjects that will enable any student or junior doctor to 'hit the ground running' when they enter one of the most exciting areas of clinical medicine. *Adult Emergency Medicine at a Glance* is: A concise, visually orientated course in emergency medicine that is perfect for both study and revision Organised around symptoms: 'Short of Breath', rather than diagnoses: 'Pneumonia' Focused on the most common or dangerous conditions you will see in the Emergency Department and includes the latest cardiac resuscitation guidelines Comprehensively illustrated throughout with over 47 full-page colour illustrations

From his boyhood in Tipperary, Kildare, and Donegal to the pinnacle of biblical scholarship, John Dominic Crossan's adventurous spirit has led him to seek out the truth no matter where it leads. In this delightful memoir, the former monk and controversial biblical scholar tells how his work as a pioneering historical Jesus expert has led him from the traditional Catholicism of his youth to a more complex, sophisticated faith. With characteristic wit and candor, he describes the joys and challenges of growing up in Ireland and reveals how his life experiences—from Ireland to America, Rome, and Israel, from monastery to university, from priesthood to marriage—have shaped his understanding of God, Jesus, the Church, and what it means to be a true Christian.

We all know the proverb about teaching someone to fish, but if there are no fish left, knowing how to catch them won't do you any good. And that's the position businesses are in today. Resources are being depleted at an alarming rate and the cost of raw materials is rising dramatically. As a result, scholar and entrepreneur Nadya Zhexembayeva says, businesses need to make resource scarcity—the overfished ocean—their primary strategic consideration, not just a concern for their “green” division. *Overfished Ocean Strategy* offers five essential principles for innovating in this new reality. Zhexembayeva shows how businesses can find new opportunities in what were once considered useless by-products, discover resource-conserving efficiencies up and down their value chain, transfer their expertise from physical products to services, and develop ways to rapidly try out and refine these new business models. She fills the book with examples of companies that are already successfully navigating the overfished ocean, from established corporations such as BMW, Microsoft, and Puma to newcomers such as Lush, FLOW2, and Sourcemap. The linear, throwaway economy of today—in which we extract resources at one end, create products, and throw them away at the other—is rapidly coming to an end. In every industry, creative minds are learning how to make money by taking this line and turning it into a circle. Nadya Zhexembayeva shows how you can join them and avoid being left high and dry.

This book is evolved from the experience of the author who taught all lab courses in his three decades of teaching in various universities in India. The objective of this lab manual is to provide information to undergraduate students to practice experiments in electronics laboratories. This book covers 118 experiments for linear/analog integrated circuits lab, communication engineering lab, power electronics lab, microwave lab and optical communication lab. The experiments described in this book enable the students to learn:

- Various analog integrated circuits and their functions
- Analog and digital communication techniques
- Power electronics circuits and their functions
- Microwave equipment and components
- Optical communication devices

This book is intended for the B.Tech students of Electronics and Communication Engineering, Electrical and Electronics Engineering, Biomedical Electronics, Instrumentation and Control, Computer Science, and Applied Electronics. It is designed not only for engineering students, but can also be used by BSc/MSc (Physics) and Diploma students.

**KEY FEATURES**

- Contains aim, components and equipment required, theory, circuit diagram, pin-outs of active devices, design, tables, graphs, alternate circuits, and troubleshooting techniques for each experiment
- Includes viva voce and examination questions with their answers
- Provides exposure on various devices

**TARGET AUDIENCE**

- B.Tech (Electronics and Communication Engineering, Electrical and Electronics Engineering, Biomedical Electronics, Instrumentation and Control, Computer Science, and Applied Electronics)
- BSc/MSc (Physics)
- Diploma (Engineering)

course in probability for students who have some familiarity with basic calculus. Reflecting the author's philosophy that the best way to learn probability is to see it in action, there are more than 350 problems and 200 examples. The examples contain all the old standards such as the birthday problem and Monty Hall, but also include a number of applications not found in other books, from areas as broad ranging as genetics, sports, finance, and inventory management.
