Provides necessary training in the field of mobile communications.

Wordplay involving several linguistic codes represents an important modality of ludic language. It is attested in different epochs,

communicative situations, genres, and contexts of use. The translation of wordplay, which is generally seen as a challenging enterprise, illustrates another dimension of crossing linguistic borders in wordplay. The third volume of the series *The Dynamics of Wordplay* unites contributions from different disciplines which study the creative and playful use of elements from different languages and the transfer of ludic language into other linguistic systems. It sheds light on the multi-dimensionality, special linguistic make-up, and specific interactive potential of wordplay at the interface of different languages and cultures. The individual studies collected in this volume will be of interest to scholars from different scientific fields, such as linguistics and literary studies as well as cultural and media studies.

Many Catholics are unaware of our holy traditions on and powerful devotions to the Sorrows of Mary. Based on Scripture and the lives of the Saints, this little book will open eyes and hearts to the Sorrows of Our Lady.

What can stories of magical engraved rings or prophetic inscriptions on walls tell us about how writing was perceived before print transformed the world? *Writing beyond Pen and Parchment* introduces readers to a Middle Ages where writing is not confined to manuscripts but is inscribed in the broader material world, in textiles and tombs, on weapons or human skin. Drawing on the work done at the Collaborative Research Centre “Material Text Cultures,” (SFB 933) this volume presents a comparative overview of how and where text-bearing artefacts appear in medieval German, Old Norse, British, French, Italian and Iberian literary traditions, and also traces the paths inscribed objects chart across multiple linguistic and cultural traditions. The volume’s focus on the raw materials and practices that shaped artefacts both mundane or fantastical in medieval narratives offers a fresh perspective on the medieval world that takes seriously the

vibrancy of matter as a vital aspect of textual culture often overlooked.

Guidebook which aims to improve MPA management by providing a framework that links the goals and objectives of MPAs with indicators that measure management effectiveness. The framework and indicators were field-tested in 18 sites around the world, and results of these pilots were incorporated into the guidebook. Published as a result of a 4-year partnership of IUCN's World Commission on Protected Areas-Marine, World Wildlife Fund, and the NOAA National Ocean Service International Program Office.

How and why do changes happen when and where they do? Is it possible to explain changes that occurred centuries ago? These are the central questions addressed in this book, in which the author argues that the development of numerous features of medieval (and modern) Spanish can best be explained as the results of koineization, a process in which mixing among speakers of different dialects leads to the rapid formation of a new mixed and generally simplified variety. The book includes a complete introduction to koineization and detailed study of three stages of dialect mixing in medieval Spanish.

The book includes research papers on current developments in the field of soft computing and signal processing, selected from papers presented at the International Conference on Soft Computing and Signal Processing (ICSCSP 2018). It features papers on current topics, such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms and machine learning. It also discusses various aspects of these topics, like technologies, product implementation, and application issues.

In *Italian Readers of Ovid from the Origins to Petrarch*, Julie Van Peteghem examines Ovid's influence on Italian poetry from its beginnings, through Dante, to Petrarch, situating it within the history of reading Ovid in medieval and early modern Italy.

This book constitutes the refereed proceedings of seven workshops held at the 18th International Conference on Image Analysis and Processing, ICIAP 2015, in Genoa, Italy, in September 2015: International Workshop on Recent Advances in Digital Security: Biometrics and Forensics, BioFor 2015; International Workshop on Color in Texture and Material Recognition, CTMR 2015; International Workshop on Medical Imaging in Rheumatology: Advanced applications for the analysis of inflammation and damage in the rheumatoid Joint, RHEUMA 2015; International Workshop on Image-Based Smart City Application, ISCA 2015; International Workshop on Multimedia Assisted Dietary Management, MADiMa 2015; International Workshop on Scene Background Modeling and initialization, SBMI 2015; and International Workshop on Image and Video Processing for Quality of Multimedia Experience, QoEM 2015.
