The Geography of Strabo is the only surviving work of its type in Greek literature, and the major source for the history of Greek scholarship on geography and the formative processes of the earth. In addition, this lengthy and complex work contains a vast amount of information on other topics, including the journey of Alexander the Great, cultic history, the history of the eastern Mediterranean in the first century BC, and women's history. Modern knowledge of seminal geographical authors such as Eratosthenes and Hipparchos relies almost totally on Strabo's use of them. This is the first complete English translation in nearly a century, and the first to make use of recent scholarship on the Greek text itself and on the history of geography. The translation is supplemented by a detailed discussion of Strabo's life and his purpose in writing the Geography, as well as the sources that he used.

This book investigates and re-evaluates the remains of the two most important sanctuaries in ancient Greece.

**Sound-Power Flow:** A practitioner's handbook for sound intensity is a guide for practitioners and research scientists in different areas of acoustical science. There are three fundamental quantities in acoustics: sound pressure, sound particle velocity, and sound intensity. This book is about sound intensity and demonstrates the advantages and uses of acoustical sensing compared with other forms of sensing. It describes applications such as: measuring total sound power; directional hearing of humans and mammals; echolocation; measuring sound-power flow in ducts; and uses of non-contact, focused, high-frequency, pulse-echo ultrasonic probes. This book presents computational approaches using standard mathematics, and relates these to the measurement of sound-power flow in air and water. It also uses linear units rather than logarithmic units - this making computation in acoustics simpler and more accessible to advanced mathematics and computing. The book is based on work by the author and his associates at General Motors, the University of Mississippi, and Sonometrics.
