Directing film or television is a high-stakes occupation. It captures your full attention at every moment, calling on you to commit every resource and stretch yourself to the limit; it's the white-water rafting of entertainment jobs. But for many directors, the excitement they feel about a new project tightens into anxiety when it comes to working with actors. In the years since the original edition of Directing Actors was published, the technical side of filmmaking has become much more easily accessible. Directors tell me that dealing with actors is the last frontier--the scariest part and the part they long for--the human part, the place where connection happens. Weston's books help directors scale the heights of the actor-director dynamic, learn the joys of collaborating with actors--and become an "actor's director."

The collaboration of director and actor is the cornerstone of narrative filmmaking. This book provides the director with a concrete step-by-step guide to preparation that connects the fundamentals of film-script analysis with the actor's process of preparation. This book starts with how to identify the overall scope of a project from the creative perspective of the director as it relates to guiding an actor, before providing a blueprint for preparation that includes script analysis, previsualization, and procedures for rehearsal and capture. This methodology allows the director to uncover the similarities and differences between actor and director in their preparation to facilitate the development of a collaborative dialogue. Featuring chapter-by-chapter exercises and assignments throughout, this book provides a method that enables the director to be present during every stage of production and seamlessly move from prep to filming, while guiding the actor to their best performances. Written in a clear and concise manner, it is ideal for students of directing, early career, and self-taught directors, as well as cinematographers, producers, or screenwriters looking to turn their hand to directing for the first time.

This is second edition of The Art of Directing Actors book. The book may look like other books you have seen, but there are some important differences which will make it easier and more helpful: This handbook- concentrates on the most common mistakes made by film and theater directors and actors ("20 examples of the result-oriented and general directions"). We sought to keep the guide complete enough to answer all your questions without becoming thick enough to become a doorstop. The Art of Directing Actors has all the tools you need to effectively direct actors and to create memorable performances.- presents directing actors as a practical psychology: the art of managing human behavior.- explains modern and classic methods of directing actors (17 methods or tools of the director and actors). You will have a complete and versatile toolbox for use in any film or theater production. You need not look in other books to find these tools.- presents a comprehensive source-book for directors and actors. It contains a full list of action verbs with a thesaurus and a classification of action verbs, examples of a full script breakdown with spines, needs, objectives, actions and adjustments.- gives the practical application of the tools (The Bear, The importance of being earnest). You will have the script breakdown of the classic plays of Anton Chekhov and Oscar Wilde.- offers exercises in a useful format. In order to apply your understanding of various methods of directing actors, explore the relevant exercises.

Honed after years of on-set experience and from teaching, DeKoven's approach aims to provide a helpful reference and resource for directors and actors alike. It combines underlying theory with dozens of exercises designed to reveal the actor's craft. Foreword by Oscar(-winning director Ang Lee ("Crouching Tiger, Hidden Dragon").

This is a handbook that has all the tools you'll need to effectively direct actors and to create memorable performances. By detailing out modern and classical methods for directing actors, you'll have a complete and versatile toolbox to draw on for use in any film or theater production (17 tools). The Art of Directing Actors points out the most common mistakes made by film and theater directors and actors, and offers ways to do better. In addition, a full list and classification of action verbs with a thesaurus, plus examples of a full script breakdown (The Bear by Anton Chekhov) with objectives, actions, and other tools are included. Finally, there are exercises in a useful format so you may apply your understanding of the several methods of directing actors. This book is about the art of directing actors, whether it is for film or for theater. The inner life of the actor, acting techniques, certain rules of human behavior, common mistakes of the director, and various methods of directing are discussed. Meaningful and successful directing is not an arbitrary manipulation of the actor's behavior. A director can't effectively extract a specific result from an actor in the form of an emotion such as cry, be sad, etc. by simply commanding it. The art of directing is expressed in the distillation of ideas, and making the proper choices to best express those ideas. The art of acting and the art of directing are related to each other as in the two sides of one coin. Learning methods for directing actors is not difficult by itself. The main difficulty lies in the application of the methods. By continuous practice and experience over time, good directing will follow in an easy, elegant and graceful way. Being graceful is a supreme goal of an artist, and a director is an artist and the reason this book is called The Art of Directing Actors.

Describes the basic principles of film making, argues that directing is an extension of screenwriting, and explains how films tell stories

The second edition of this elegant and accessible primer offers a helpful reference and resource for directing actors in film, television, and theatre, useful to directors, actors, and writers. Combining underlying theory with dozens of exercises designed to reveal the actor's craft, Lenore DeKoven discusses constructing the throughline; analyzing the script; character needs; the casting and rehearsal processes; as well as the actor and the camera. Distilling difficult concepts to their simplest form, DeKoven explains how to accurately capture and portray human behavior on stage and screen, offering creative solutions to issues she has encountered or anticipated after decades of experience. Excerpts from interviews with acclaimed actors offer insight into their work with directors, what inspires them, and what they really want from the director. This second edition incorporates the film Moonlight (2016, Barry Jenkins) for analysis of the directing concepts discussed.

Directing Actors: A Practical Aesthetics Approach is the first book to apply the Practical Aesthetics acting technique to the craft of directing. Lee Cohn lays out a step-by-step, no-nonsense methodology for the director that includes a deep dive into the mechanics of storytelling, the rehearsal process, working with writers, and the practical realities of the director's job. Featuring end-of-chapter exercises, this book provides a clear and effective means of breaking down a script in order to tell a story with clarity, simplicity, and dramatic force and gives directors a clear working vocabulary that will allow effective communication with actors. The techniques in this book are applicable to any theatrical style and any media platform in which a director might work. Written in an accessible, conversational style, this book strips the process of directing down to its most essential components to explain how to become an "actor's director." A must-read for students in directing courses and professional directors working with actors who prescribe to the Practical Aesthetics technique, as well as anyone interested in the process of working with actors, Directing Actors will help directors to get the very best their actors are capable of while approaching the work with a joyful, open spirit.

Learn how to read a script, find its core, determine your vision, communicate with writers, actors, designers, cinematographers, editors, composers, and all the members of your creative team in order to insure that your vision reaches the screen.
