Realists contend that trade compels states to struggle for vital raw materials and markets. Moving beyond the stale liberal-realist debate, *Economic Interdependence and War* lays out a dynamic theory of

Taking a broad look at cases spanning two centuries, from the Napoleonic and Crimean wars to the more recent Cold War crises, Dale Copeland demonstrates that when leaders have

Why is it that political conflict between countries sometimes undermines commerce between those states, and yet at other times it seems to have little or no effect on cross-border economic flows? The question is an important one, yet, while numerous studies have considered
