When a global crisis impacts nearly every industry, education is always one of the most impacted as students and faculty must frantically try to maintain their educational programs throughout uncertain times. Beyond the educational courses themselves being shifted online or to hybrid approaches, there must be a focus on the impact on students as well. With newfound ways of learning, new online environments, and new methods for teaching, students are greatly impacted by the changing face of education. The traditional ways in which students have been served and assisted have changed rapidly, and to make matters even more challenging, students must handle both living in a time of crisis while adapting to swift educational transformations. The dissemination of best practices and maintaining student success during global crises is an area of research that is not only growing in interest but is critical in pandemic times. Strategies for Student Support During a Global Crisis reflects on how educational professionals have worked with students during global crises, how serving and teaching students have been impacted, and the best practices for student success in both online education and hybrid formats. The chapters will include topics such as mentoring models, teaching methods, educational technologies, teacher insights, academic support services, and more. This book is ideal for educational professionals, leaders, school administration, teachers, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the best strategies for supporting students and promoting student success during global crises.

Science Tests and Reviews, consisting of science sections of the first seven MMYs and Tests in Print II, includes 217 original test reviews written by 81 specialists, 18 excerpted test reviews, 270 references on the construction, use, and validity of specific tests, a bibliography on in-print science tests, references for specific tests, cumulative name indexes for specific tests with references, a publishers directory, title index, name index, and a scanning index. The 97 tests covered fall into the following categories: 23 general; 14 biology; 35 chemistry; 3 geology; 6 miscellaneous; and 16 physics.
