Electronic Tools for Translators offers complete explanations of a wide range of software products, information resources and online services that translators now need to understand and use. Individual chapters run through the origins and nature of the internet, the many ways of searching for information, and translation resources on the web, CD-ROMs as information sources, computer-assisted terminology management, the use and construction of corpora, translation memories, localization tools, and the incorporation of machine translation programmes into the translation process. Austermühl explains all these tools and resources in a clear, step-by-step way, suggesting learning tasks and activities for each chapter and guiding the reader through the jargon. Examples are drawn from English, French, German and Spanish. The book can be used as a text in regular classes on computer-assisted translation, in translation practice classes, as well as for self-learning by professionals wishing to update their skills.

Trends in E-Tools and Resources for Translators and Interpreters offers a collection of contributions from key players in the field of translation and interpreting that accurately outline some of the most cutting-edge technologies in this field.

This volume offers a comprehensive, multilingual approach to the practice and profession of translation and interpretation as shaped by global markets, advanced technologies and digital literacy. It offers a joint, scholarly-pedagogical, practice-oriented perspective taking stock of recent developments and topical concerns in the field. The book provides a transdisciplinary overview of multilingualism as a phenomenon inextricably connected with the global condition of the subject, with emphasis on cross-cultural communication and the professions of translation and interpretation. As such, it constitutes an accessible and productive pedagogical resource.

Drawing together some of the leading authors in tourism, this text provides state-of-the-art reviews of research in fields of tourism. The text also revisits classic reviews which first appeared in Progress in Tourism, Recreation and Hospitality Management series, over a decade before the publication of this title. Topics covered include gender, alternative tourism, urban tourism, heritage tourism and environmental auditing.

The Routledge Course in Arabic Business Translation: Arabic-English-Arabic is an essential coursebook for university students wishing to develop their skills in translating different types of business texts between English and Arabic. Practical in its approach, the book introduces translation students to the concept of translation and equivalence in the context of business texts, business translators, and the linguistic and syntactic features of business texts. It also highlights translation tools and technology in addition to the translation strategies which can be adopted to render business texts between English and Arabic. Key features in the book include: 1 Six comprehensive chapters covering (after the Introduction) the areas of economics, management, production, finance, and marketing in the translation industry; 2 Detailed explanation of the lexical and syntactic features of business texts; 3 Practical English and Arabic business translation texts featuring a vast business vocabulary bank; 4 Authentic business texts extracted from English and Arabic books containing economic, management, production, finance, and marketing texts; 5 Great range of English and Arabic translation exercises to enable students to practice their familiarity with business vocabulary they learned throughout the book; and 6 Glossaries following all English and Arabic business texts containing the translation of main vocabulary items. The practicality of the approach adopted in this book makes it an essential business translation coursebook for translation students. In addition, the carefully designed content helps students to easily explore different types of business texts, familiarize themselves with main words, and do translation exercises. University instructors working on English and Arabic business translations will find this book highly useful.

This is a book about the teaching and particularly the acquisition of translation-related skills and knowledge. Well grounded in theory, the book also provides numerous examples drawn from the author's extensive classroom experience in translator education and foreign language teaching. Kiraly uses a number of classroom case studies to illustrate his method, including: introductory courses in translation studies, project-based translation practice courses, translation studies seminars, as well as naturalistic foreign language learning classes for student translators. The book is primarily geared toward translator educators and programme administrators, as well as students of translation, and will also be of interest to foreign language teachers who incorporate translation into their teaching, to translation scholars, and to others involved in the world of translation.

Translation has been instrumental in opening the door between China and the rest of the world from ancient times to the present day, and has helped facilitate cultural exchange and the sharing of knowledge. This book makes and important contribution to the study of translation into and from Chinese. A wide range of topics are covered, such as Chinese canonization of Buddhism, Chinese cultural identity and authenticity in translation, Chinese poetry, opera, politics and ideology in translation, and the individual contributions made by translators to modernity and globalisation. The analyses and arguments offered by the authors make this book a must read for anyone interested in translation from a Chinese perspective.
