leader at board level. . . Trevor K. Horne, *Leadership Matters Corporate Governance and Ethics* is an illuminating and practical reading of Aristotle's *Politics* for today's corporate directors. With a deft synthesis of ethics, economics and politics, Alejo Sison elevates the discussion of corporate governance out of the realm of abstract rules and structures into a more effective form of Aristotelian politics. He argues that corporate governance is a human practice where subjective, ethical conditions outweigh the mastery of techniques, since the firm is not a mere

production function but, above all, a community of workers. Corporate governance issues are discussed in a holistic fashion, using international case studies to embed the discussion in environments defined by their economic, legal and cultural systems. One of the author's key messages is that reform starts with the ethical and political education of directors. Alejo Sison uses an integrative approach to corporate governance that incorporates ethical-political considerations with the economic and legal dimensions of issues. He backs his theoretical claims with a series of case histories including Fiat from Italy, Cheung Kong Holdings and Whampoa Limited from China, Banco Popular from Spain and United Airlines from the US. He provides a special focus on the education of corporate directors in accordance with the principles of Aristotle's Politics. This

The discussion has a multidisciplinary outlook and explores how the concept of care ethics might be successfully applied to various professional contexts. This volume takes a hard look at the soft practice of corporate governance. It grew out of a series of contributions from the Third ISBEE World Congress on Business Ethics that took place on July 2004 in Melbourne.

Is profit-making the only goal of a business? Should an unbridled market mechanism drive corporate enterprise? To what extent should corporations compensate for the manifest and hidden costs that are incurred by the society at large? These are some of the questions that have engaged specialist economists, business barons, corporate heads and management experts for decades. A consensus has emerged that corporate

practices cannot bypass the fundamental demands of ethical behaviour, that administration and policies of governance have to be more transparent and publicly accountable, and that businesses must be sensitive to the community and environment within which they are established. This has led to the emergence of three key concepts of contemporary businesses, namely, business or corporate ethics, corporate governance, and corporate social responsibility.

Governance and ethics are intertwined. A government functions within certain broad moral and ethical parameters, integrally linked with the sociological foundation of the polity in which it is articulated. The importance of ethics in governance has acquired a significant place in contemporary theoretical discussion. This book situates ethics in governance in India in the national frame and incorporates the context of globalization, allowing for the increasing importance of non-state global actors in national decision making. The author argues that a lack of ethics quickly

turns into corruption and leads to governmental efforts to deal with it. He proposes that ethics are a set of standards that a society places on itself to articulate its responses to societal needs, and discusses the efforts of the Indian government at eradicating corruption and its failure. A theoretical approach to the issues of ethics in governance and corruption, this book is of interest to academics in the fields of Asian Politics, in particular Indian politics, and political philosophy.
