and an insider's look at Iraqi Pre-War Intelligence, told by one of the very few U.S. Assets covering Iraq before the War. It reveals the depths of deception by leaders in Washington and London to promote a successful image of their terrorism policy, and the shocking brutality to suppress the truth of their failures from Americans and the world community.

people's lives. In law it is said that "it doesn't matter what one believes, only what one can prove." The same can be said for psychiatric diagnosing. It matters little what anyone in the medical/psychiatric community "believe" is the cause(s) of mental illness. The question that has not been answered is whether tens of millions of Americans who have been diagnosed with any one or number of psychiatric mental disorders suffer from a mental "disease" - an objective, confirmable abnormality of the brain. What is known is that neither the American Psychiatric Association nor the National Institute of Mental Health, nor any other medical organization, is capable today of making available scientific evidence to prove that any psychiatric disorder is an objective, confirmable abnormality of the brain. This mantra is repeated

throughout the book because it is the point of the book. That people are suffering isn't in question. Whether they actually suffer from a psychiatric disorder that is a known objective, confirmable abnormality of the brain is in question because selling mental disorders as "disease," such as the theoretical chemical imbalance, has become the norm in the medical/psycho pharmaceutical Community and it is blatantly false. The People, if given the truth, can take it. The decision to accept the psychiatric diagnosis and seek treatment with psychiatric mind-altering drugs may be no different, but at least the decision will be based on all the truth, the objective confirmable scientific evidence, not theories, wishful thinking, deceptive advertising and misleading advocacy group, pharmaceutical company and government-sponsored

From the bestselling author of Communion comes the mysterious true story of how an unknown visitor barged into Streiber's hotel room late one night--and imparted extraordinary lessons in personal development and man's fate that challenge us to rethink every assumption about the meaning of life. At two-thirty in the morning of June 6, 1998, Whitley Streiber was awakened by somebody knocking on his hotel room door. A man came in, and everything he said was life-altering. This is the unsettling and ultimately enlightening narrative of what happened that night. Strieber was never really sure who this strange and knowing visitor was--a "Master of Wisdom"? A figure from a different realm of

consciousness? A preternaturally intelligent being? He called him the Master of the Key. The one thing of which Strieber was certain is that both the man and the encounter were real. The main concern of the Master of the Key is to save each of us from self-imprisonment. "Mankind is trapped," the stranger tells Strieber. "I want to help you spring the trap." In a sweeping exchange between Strieber and the stranger--which takes the form of a classical student- teacher dialogue in pursuit of inner understanding--the unknown man presents a lesson in human potential, esoteric psychology, and man's fate. He illuminates why man has been caught in a cycle of repeat violence and self-destruction--and the slender, but very real, possibility for release. In its breadth and intimacy, The Key is on par with contemporary metaphysical

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her

or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being

shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. in the world, and hardship and pain. And we should be humble and modest in our belief we can eliminate those things. But we shouldn't use that as an excuse for cynicism and inaction. I take away . . . the sense we have to make these efforts knowing they are hard.”—President Barack Obama Forged during the tumultuous but triumphant postwar years when America came of age as a world power, *The Irony of American History* is more relevant now than ever before. Cited by politicians as diverse as Hillary Clinton and John McCain, Niebuhr's masterpiece on the incongruity between personal ideals and political reality is both an indictment of American moral complacency and a warning against the arrogance of virtue. Impassioned, eloquent, and deeply perceptive, Niebuhr's wisdom will cause readers to

rethink their assumptions about right and wrong, war and peace. “The supreme American theologian of the twentieth century.”—Arthur Schlesinger Jr., *New York Times* “Niebuhr is important for the left today precisely because he warned about America’s tendency—including the left’s tendency—to do bad things in the name of idealism. His thought offers a much better understanding of where the Bush administration went wrong in Iraq.”—Kevin Mattson, *The Good Society* “Irony provides the master key to understanding the myths and delusions that underpin American statecraft. . . . The most important book ever written on US foreign policy.”—Andrew J. Bacevich, from the Introduction
