Clear. Accurate. Current. The new twelfth edition of Financial and Managerial Accounting: A Basis for Business Decisions unites this text's long-running standard of excellence with a thorough revision reflecting contemporary concepts and issues in accounting. The managerial accounting section has been expanded making this book appropriate for the 50/50 split accounting principles courses that employ a corporate approach. The hallmarks of this text continue to be exceptional balance between the preparer and user points of view, excellent real-world examples that do not distract students from the text narrative, and clear writing style. This is a reflection of the authors and their well-known dedication to accounting education.

Financial and Managerial Accounting: The Basis for Business Decisions continues to offer a solid foundation for students who are learning basic accounting concepts. Known for giving equal weight to financial and managerial topics, the authors emphasize the need for a strong foundation in both aspects of accounting. Hallmarks of the text - including the solid Accounting Cycle Presentation, managerial decision making, relevant pedagogy, and high quality, end-of-chapter material—have been updated throughout the book.

Written by Jan Williams. For each chapter, students can measure their progress through a wealth of self-test material (with solutions) and a summary of each chapter's key points.

Presents the research and cases that focus on the professional responsibilities of accountants and how they deal with the ethical issues they face. This title features articles on a broad range of important topics, including professionalism, social responsibility, ethical judgment, and accountability.

industry plays a vital part in the overall economic, social, and political aspects of this region, as well as on a larger international scale. Managerial Strategies and Solutions for Business Success in Asia is an authoritative reference source for the latest collection of research perspectives on the development and optimization of various business sectors across the Asian region and examines their role in the globalized economy. Highlighting pertinent topics across an interdisciplinary scale, such as e-commerce, small and medium enterprises, and tourism management, this book is ideally designed for academics, professionals, graduate students, policy makers, and practitioners interested in emerging business and management practices in Asia.

Issues in Financial Accounting addresses the controversial issues in financial accounting that have been debated by the preparers, users, auditors and regulators of financial statements. Henderson provides the best balance of technical and theoretical coverage in any Financial Accounting text on the market today, with its presentation of real-world examples, current debates and the underlying rationale for the accounting concepts demonstrated. Throughout the text, academic studies and professional accounting research are referenced to also provide a critical understanding of historical debates in financial accounting. The new 15th edition covers significant recent developments to the accounting standards in Australia and is based on the AASB standards and interpretations that have been issued up to the end of 2012. This includes the Australian Accounting Standard Board's (AASB) program of changes to make accounting standards equivalent to International Financial Reporting Standards.

"This book focuses on the technical planning of power systems, taking into account technological evolutions in equipment as well as the economic, financial, and societal factors that drive supply and demand and have implications for technical planning at the micro level"--Provided by publisher.
