Printers nowadays are having to learn new technologies if they are to remain competitive. This innovative, practical manual is specifically designed to cater to these training demands. Written by an expert in the field, the Handbook is unique in covering the entire spectrum of modern print media production. Despite its comprehensive treatment, it remains an easy-to-use, single-volume reference, with all the information clearly structured and readily retrievable. The author covers both traditional as well as computer-aided technologies in all stages of production, as well as electronic media and multimedia. He also deals with training, research, strategies and trends, showing readers how to implement the latest methods. With 1,200 pages, containing 1,500 illustrations - over half in colour - the Handbook conveys the current state of technology together with its specific terminology. The accompanying CD-ROM includes the entire manual in fully searchable form, plus additional software tools. Invaluable information for both beginners and "old hands" in printing works, publishing houses, trade associations, the graphics industry, and their suppliers.

Part travel diary, part cultural anthropology, part philosophical musing, part poetic digression, The Itinerant Printer book is a series of interconnected yet independent vignettes that tell the story of two and a half years on the road visiting letterpress shops throughout America & Canada. The large-format, hardcover book comprises over 300 pages and over 1,500 photos from the 2015-17 journey. This is the ultimate index of this printing adventure, the culmination of all the miles, all the ink, all the paper, all the type, and the blood, sweat, and tears.

Gorgeous, fascinating and unconventional, the maps in this collection show aspects of the Gulf Islands, the 'Islands in the Salish Sea', that are most beloved by the residents, from heritage orchards, fishing spots and patches of endangered wild orchids to ancient First Nations' sites and bird colonies. The community on each island decided what elements should be depicted, and local artists then created each of the magnificent and wildly different maps. This volume is a treasure-trove of cherished information that could have been lost, presented with imagination and great beauty. The Islands in the Salish Sea Community Mapping Project was coordinated by Sheila Harrington and Judi Stevenson, who live on Saltspring Island.
