Each chapter in this textbook covering forces, motion, and energy features a chapter review, test preparation, and suggestions for follow-up activities that include step-by-step instructions for an experiment and suggested reading.

Spectrum Science Test Practice provides the most comprehensive strategies for effective science test preparation! Each book features engaging and comprehensive science content including physical science, earth and space science, and life science. The lessons, perfect for students in grade 8, are presented through a variety of formats and each book includes suggestions for parents and teachers, as well as answer keys, a posttest, and a standards chart. Today, more than ever, students need to be equipped with the essential skills they need for school achievement and for success on proficiency tests. The Spectrum series has been designed to prepare students with these skills and to enhance student achievement. Developed by experts in the field of education, each title in the Spectrum workbook series offers grade-appropriate instruction and reinforcement in an effective sequence for learning success. Perfect for use at home or in school, and a favorite of parents, homeschoolers, and teachers worldwide, Spectrum is the learning partner students need for complete achievement.

Fundamentals of Biomechanics introduces the exciting world of how human movement is created and how it can be improved. Teachers, coaches and physical therapists all use biomechanics to help people improve movement and decrease the risk of injury. The book presents a comprehensive review of the major concepts of biomechanics and summarizes them in nine principles of biomechanics. Fundamentals of Biomechanics concludes by showing how these principles can be used by movement professionals to improve human movement. Specific case studies are presented in physical education, coaching, strength and conditioning, and sports medicine.
