Honda Ex5 Dream

Called the EX5 in Malaysia, the Dream is powered by a single-cylinder, air-cooled, 110cc engine with PGM-Fi. It's paired with a four-speed automatic clutch gearbox. The EX5 produces a staggering 8.5 hp at 7,500 rpm and 8.62 Nm of torque at 5,500 rpm. There's electric and kick start means fitted as standard.

---

Honda Malaysia is still selling the Dream (EX5) in 2020 ...

The cast wheel option is priced at RM 4,783, while the tubeless alloy wheel EX5 is at RM 5,009 (both prices are insurance, registration and road tax excluded). Powering the 2020 Honda EX5 is the 110 cc air-cooled, single-cylinder engine that's supported by Honda's Programmed Fuel Injection (PGM-Fi) system.

Honda Dream - Wikipedia

Jika dilihat pada risalah, EX5 Dream 110 dikatakan mampu bergerak sehingga 214 kilometer (km) menerusi satu isian petrol. Tetapi dengan cara tunggangan saya, angka itu tidak mungkin dapat dicapai. Jika jarum minyak berada di garisan merah, anda boleh mengisi minyak RON95 sebanyak RM6 untuk memenuhi tangkinya.

In the 17th century Sir Francis Bacon advocated the patient study of Nature for the benefit of mankind. Most of science today, in its study of medicine, genetics, electronics etc., continues that pragmatic Baconian tradition without fuss. Over the years, however, as its investigation of Nature probed ever deeper into regions far removed from common experience, science has increasingly exhibited traits more usually associated with fundamentalist religion than with dispassionate study. Articulate voices from biology preach the belief in 18th century materialism in the study of evolution; those from physics promulgate a kind of mathematical theology in its study of elementary particles and cosmology; both inveigh against heresy. But science should be beyond that sort of belief. It should not see its undoubted success in manipulating matter as justifying any sort of religious status, as offering a spiritual foundation alternative to religion. As a scientist himself, Brian Ridley is appalled by such theological trends, hence this book. It is an attempt to address these concerns, to reform science, to place science in its broad historical and philosophical context where dogmatic belief has no place, to remind science itself that it has limitations.

When murdered sinners fail to show up in Hell, it's up to Salim Ghadafar, an atheist warrior forced to solve problems for the goddess of death, to track down the missing souls. In order to do so, Salim will need to descend into the anarchic city of Kaer Maga, following a trail that ranges from Hell's iron cities to the gates of Heaven itself. Along the way, he'll be aided by a host of otherworldly creatures, a streetwise teenager, and two warriors of the mysterious Iridian Fold. But when the missing souls are the scum of the earth, and the victims devils themselves, can anyone really be trusted? From acclaimed author James L. Sutter comes the sequel to Death's Heretic, the novel ranked #3 on Barnes & Noble's Best Fantasy Releases of 2011!

Someone had posted a dead rat through Jana Jakubowska's letterbox, and scrawled obscene graffiti on her garden wall. Harmless pranks, or something more sinister? Her boyfriend, Tom Renwick, hired me to find out. During my investigation, I met Jana's charming four-year-old daughter, Krystyna, her estranged former lover, Matt Taylor, and a local hoodlum called Naz. As the case unfolded, the trail led to murder, and a situation that placed Krystyna in danger. The Rat Man had revealed his ruthless streak, but surely he wouldn't harm a child? Meanwhile, my friend and colleague, Faye Collister, was trying to reconcile her troubled past with her feelings for Blake the Bodyguard, a handsome hunk. Digging in the Dirt, a story of passionate love, and extreme hate.

Today, the belief that human beings are special is distinctly out of fashion. Almost every day we are presented with new revelations about how animals are so much more like us than we ever imagined. The argument is at its most powerful when it comes to our closest living relatives - the great apes. This book argues that whatever first impressions might tell us, apes are really not 'just like us'. Science has provided strong evidence that the boundaries between us and other species are vast. Unless we hold on to the belief in our exceptional abilities we will never be able to envision or build a better future - in which case, we might as well be monkeys.

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

Traces the history of the Harley-Davidson, and shows and describes each major model from the 1909 model 5 to the current FXRS Sport
