Chip tuning has been tested on these models with great results. While high altitude, build variation, and dyno variables will cause small variations in actual and measured power, your average engine will make about 170 hp and 320 lb-ft torque after a chip flash. The big difference vs. 2006 and earlier TDI is the diesel particulate filter.

Amazon.com: Customer reviews: How to Build & Power Tune ...

Book review: How to build and power tune Holly carburetors. Des Hammill's book was published in the UK in October 2005, making it recent and relevant in chronological terms — especially for the auto industry, where tuner books are often a decade or two old — but sometimes less than complete for American buyers, especially those with vehicles not made by GM.
