Many introductory Corporate Finance textbooks tout their engaging, real-world examples, but they often fail to hold students' interest. "A Novel Introduction to Corporate Finance" offers a unique, innovative, and refreshing contrast. Structured as a work of literary fiction, the book successfully uses a compelling narrative to tell the story of Corporate Finance. Students read about struggling Finance major Derek Foster, and his relationship with Eric Bensen, the CEO of Caspian Sea Drinks. Eric becomes a mentor to Derek. The two meet weekly as Eric shares the story of how Caspian Sea Drinks grew from a humble lemonade stand to a publicly traded company. Their conversations provide an engaging context in which the fundamental concepts and principles of Corporate Finance are presented, both to Derek and to the student reader. Plot twists provide opportunities for additional examination and discussion of ethics in the corporate world. "A Novel Introduction to Corporate Finance" successfully employs fiction to provide students with a realistic, coherent view of what a corporation is, how it comes to be, and why Finance plays an important role in corporate development and growth. The format raises fascinating questions that are often overlooked in introductory courses. Students are interested in the plot and the fate of the characters, and are consequently highly motivated to understand the integrated business concepts. By following the story, students learn about topics ranging from angel investors to venture capitalists, IPO's to derivatives. Rather than struggling to read a standard text that presents each topic separately, and often includes more material than can be successfully covered in one course, "A Novel Introduction to Corporate Finance" offers a cost-effective alternative that speaks to the power of story-telling as a valuable educational tool. This book is ideal for *Introduction to Corporate Finance and Business Finance* courses. It is an excellent teaching tool for first-time instructors, who will benefit from using a story to inform each topic. Jonathan Godbey earned his Ph.D. at the University of Georgia. He serves as the course coordinator for the introductory Finance Course at Georgia State University. Dr. Godbey is the founding editor of the "Journal of Undergraduate Research in Finance." Jason Mehl earned his MFA at Columbia College Chicago. He is an Assistant Professor of English at Toccoa Falls College. Previously, he served as the Athletic Director at Uganda Christian University, where he also taught writing and coached basketball.

The text has been designed to meet the needs of finance specialists and non-specialists, the latter being a segment of the audience that are not well catered for in the finance subject area. The text thus addresses the challenges all finance educators face: keeping students at varying degrees of ability and interest motivated and committed to the learning experience. The principal aim of the book is to deliver a student-friendly text that at the same time is theoretically rigorous. *Corporate Finance* covers the traditional topics of time value of money, risk and return, valuation, investment appraisal, capital structure and dividend policy, international finance and risk management, and financial planning. This edition is an adaptation for a European and UK audience of the text originally authored by Bill Megginson and Scott Smart, *Introduction to Corporate Finance*. The book has been rewritten, restructured and reorganized to reflect a European-centric approach. Throughout the authors have attempted to blend a balance of material it is impossible and improper to ignore the interlinkness of modern finance, and in adapting this book the authors have been conscious of this. Although the examples, terminology and currencies are mainly those of Europe and the UK, the authors have not neglected to include US and other examples where needed to illustrate a point. Students working through this text will realise by the end that while details may differ from country to country the essential questions and concerns of corporate finance remain constant.

This—revised and enhanced—book examines the role of finance in supporting other functional areas while fostering an understanding of how financial decisions can create value. *Corporate Finance* covers areas related to estimating divisional cost of capital; executing a financing strategy; establishing debt and dividend policies consistent with the company's strategy and environment; choosing between dividends and stock repurchases; managing high growth and managing working capital. Its new topics include: - *Corporate Financial Flexibility (Real options)* - *New Financial Instruments - Project Finance - Acquisitions and Control - Performance Measurement and Incentive Compensation* The goal of this book is to provide a thorough understanding of how and why firms make their financial decisions the way they do and their impact on shareholder value. The central theme of the book is Value Based Management, which assumes that maximizing shareholder value is the governing objective of a firm. Each chapter of this new edition has detailed and real-life cases to help students easily understand and grasp concepts. The author has also provided the case-map of the Harvard Business School to make this book more user-friendly in classrooms. The inclusion of several new topics/cases, extensive pedagogical tools and a finance-for-non-finance approach make this book ideal for MBA/CA/CFA/ICWA students and executive education programs.
