Although there are plenty of books devoted to small business and management research, few give much attention to the small enterprise. This book focuses systematically on researching the small firm, from basic issues of definition, to selecting topics and research designs, to fieldwork problems, analysis data and finally, writing and presenting results. The discussion is set in the wider context of issues and problems in business research. Quantitative and especially qualitative approaches are explored and illustrated by drawing in depth on a wide range of research on the small enterprise. The result is an extensive resource book for researchers at all levels to draw upon in planning and conducting effective research.

Dialogue Concerning the Two New Sciences was a 1632 bestselling book by Galileo Galilei which discussed the Copernican system and the traditional Ptolemaic system of the universe. In 1633, Galileo was convicted of heresy because of the book. It was placed on the Index of Forbidden Books after his conviction.

The BRC Global Standard for Food Safety has been extensively revised in consultation with senior representatives from major retailers and food service companies, ensuring that it continues to meet the requirements of manufacturers and retailers. The Standard was first introduced by BRC in 1998 and now has almost 14,000 certificated sites in over 100 countries across the world. Issue 6 places increased emphasis on good manufacturing practice, including a change in the balance of the number and depth of requirements in favour of the implementation of good manufacturing systems within the factory and greater focus on standardising best practices for auditing the Standard.

Unveiled Mysteries' describes Godfre Ray King's encounter with the ascended master, St. Germain. The account is extremely in-depth and detailed, and is vital reading for anyone with an interest in the subject of ascension. Many of the earliest books,

edition is based upon global research and development work over the last 50 years or more, and follows the author s series of three books Earthquake Resistant Design, 1st and 2nd editions (1977 and 1987), and Earthquake Risk Reduction (2003). Many advances have been made since the 2003 edition of Earthquake Risk Reduction, and there is every sign that this rate of progress will continue apace in the years to come. Compiled from the author s wide design and research experience in earthquake engineering and engineering seismology, this key text provides an excellent treatment of the complex multidisciplinary process of earthquake resistant design and risk reduction.

"This book provides a good grounding of the main concepts and terminology for Augmented Reality (AR), with an emphasis on practical AR techniques (from tracking-algorithms to design principles for AR interfaces). The targeted audience is computer-literate readers who wish to gain an initial understanding of this exciting and emerging technology"--Provided by publisher.
