Pucker or Puckering is the most used (abused?) term in the garment manufacturing industry. Pick up any quality controllers report, and the first thing that will strike your eye will be “ ...Puckering in armhole, ...Puckering in neckline binding, ...control Puckering in bottom hem... ” the list is endless. Buying office quality controllers are as enamoured of this term as much as manufacturers abhor it. What is it that makes it so distasteful? Why does it occur? How can it be controlled?
