This volume explores the relation between ethics and spirituality in Islam through an examination of the genres of Sufi adab, including manuals and hagiographical accounts, from the formative period of Sufism until modernity.

In the "priestly paradise" of medieval Liège, sacred music became a pervasive and versatile medium by which the clergy promoted the holy status of their city. While this hotbed of female piety and Eucharistic devotion is recognized as a center of liturgical innovation and clerical writing, the symbiosis of saintly and civic ideals voiced in locally composed plainchant and polyphony has remained overlooked. The key to unlocking the civic meaning of this music lies in the saints' legends and bishops' deeds from which it emerged and in the rituals and performance spaces in which it was heard. In *A Paradise of Priests*, Catherine Saucier forges new interdisciplinary connections between musicology, the liturgical arts, the cult of saints, church history, and urban studies to demonstrate how liégeois clerics constructed a civic sacred identity through sung rituals in conjunction with hagiographic writing and relic display. Focusing on the veneration and influence of five bishops active between the seventh and sixteenth centuries, Saucier explains how the performance of sacred music accrued new meanings at moments of signal importance in the life of the city. *A Paradise of Priests* is an essential resource for scholars and students interested in the history of the Low Countries, hagiography and its reception, and ecclesiastical institutions. Catherine Saucier is Assistant Professor of Music History at Arizona State University.

Strategic Management in Public Organizations: European Practices and Perspectives offers the first wide-ranging survey and assessment of strategic management practices at various levels of government and public service in European countries. It shows that strategic management is much more than a management tool imported from the private sector - it has become a key element of public management reforms, and European governments at all levels are developing 'strategic state' characteristics. Written by leading European experts on strategic management in the public sector and in government, this book presents evaluations and analysis based on empirical investigations. The book covers strategic management at different levels of government, explore the roles of different players, and incorporate theory and practice, with opening and concluding chapters by the editors that provide an overview of strategic management in the public services and a cross-societal discussion of practices, reforms, and lessons. It reflects not only developments in strategic management practices in the European public sector, but also the increasing importance of strategic capabilities for the modernization of public governance. This book is ideal for students in postgraduate management courses (MPA, MSc, or MBA) in Europe and elsewhere.

With variety and breadth, these essays celebrate the 800th anniversary of the foundation of the Dominican Order as well as the richness in Catholic thought and praxis during the past hundred years around the world. Their themes range from Yves Congar's view of the hierarchy to Jacques Loew's theory of ministry in the workplace. Ideas from thinkers interacting with Islam and Judaism lead on to a theology of refugees. A book for those pondering theology amid history and culture.

New essays on the unjustly neglected Pèlerinage works by de Guileville, showing in particular its huge contemporary influence.

Simple songs or airs, in which a male poetic voice either seduces or excoriates a female object, were an influential vocal genre of the French Baroque era. In this comprehensive and interdisciplinary study, Catherine Gordon-Seifert analyzes the style of airs, which was based on rhetorical devices of lyric poetry, and explores the function and meaning of airs in French society, particularly the salons. She shows how airs deployed in both text and music an encoded language that was in sensuous contrast to polite society's cultivation of chaste love, strict gender roles, and restrained discourse.
