Now in its second edition, this reader-friendly text offers a comprehensive treatment of concepts and knowledge related to teaching second language (L2) listening, with a particular emphasis on metacognition. This book advocates a learner-oriented approach to teaching listening that focuses on the process of learning to listen. It applies theories of metacognition and language comprehension to offer sound and reliable pedagogical models for developing learner listening inside and outside the classroom. To bridge theory and practice, the book provides teachers with many examples of research-informed activities to help learners understand and manage cognitive, social, and affective processes in listening. Comprehensively updated with new research and references, the new edition includes additional and expanded discussions of many topics, including metacognition in young learners, working memory, and a L2 listening systems model. It remains an essential text on L2 listening pedagogy, theory, and research.

Addresses "the systematic development of skills in listening for and interpreting auditory information. Listening skills are a crucial but often-overlooked area of instruction for children who are visually impaired and may have multiple disabilities; they relate to the expanded core curriculum for students and are essential to literacy, independent travel, and sensory and cognitive development."--AFB website.

The newly expanded Learn to Listen, Listen to Learn series prepares students for the rigors of academic classwork, helping them acquire the listening-comprehension and note-taking skills necessary for success. This two-book series offers students valuable tips for getting the most from college lectures, including note-taking skills, organization of information, recognition of language cues, and the acquisition of vocabulary. Students are shown how a typical lecture is organized, using extensive excerpts and transcripts from authentic lectures on high-interest topics from a wide range of academic discipline. Features: Includes new and updated material, including expanded vocabulary, extension, and post-lecture activities to encourage students to discuss, research, and write about ideas raised in the lectures. Teaches students how to recognize lecture organization, and how to evaluate and predict information. Focuses on the acquisition of vocabulary, especially from the Academic Word List, and on the recognition of language cues. Prepares students for academic testing with TOEFL-style test questions throughout the text. Audio CDs are also available for this text.
