Linda LeMoncheck introduces a new way of thinking and talking about women's sexual pleasures, preferences, and desires. Using the tools of contemporary analytic philosophy, she discusses methods for mediating the tensions among apparently irreconcilable feminist perspectives on women's sexuality and shows how a feminist epistemology and ethic can advance the dialogue in women's sexuality across a broad political spectrum. She argues that in order to capture the diversity and complexity of women's sexual experience, women's sexuality must be examined from two equally compelling perspectives: that of women's sexual oppression under conditions of individual and institutional male dominance; and that of women's sexual liberation, both in terms of each woman's pursuit of sexual agency and self-definition, and in terms of women's sexual liberation as a class. *Loose Women, Lecherous Men* sheds crucial new light on such much-debated topics as promiscuity, adultery, sexual deviance, prostitution, pornography, sexual harassment, and sexual violence against women. Her book supports a dialogue that encourages both women and men to take up a feminist perspective in exploring the meaning and value of sexuality in their lives.

The question of what constitutes sexual harassment—from suggestive remarks to outright threats, from off-color jokes to lewd posters on office walls—is contentious, as is the question of how to address sexual harassment. Do all instances of sexual harassment constitute sex discrimination? Are some instances merely sexual attraction gone wrong? Do social policies aimed at eliminating sexual harassment in the workplace violate freedom of expression or do they make working relationships possible between women and men? In this uncompromising yet respectful debate, two philosophers of widely divergent views present clear arguments and then respond directly to each other's reasoning. LeMoncheck argues for a feminist perspective on sexual harassment that is sensitive to the politics of gender. Hajdin contends that this perspective is both morally confusing and legally problematic, and that sexual harassment can be better addressed by traditional moral and legal categories.

Female novelists have always invested as much narrative energy in constructing their male characters as in envisioning their female. The collected articles in demonstrate that the topic of female-authored masculinities not only allows scholars to re-discover almost every novel written by a woman, but also triggers reflections on a host of theoretical questions of gender and genre.

Rape is one of the oldest crimes, yet in some ways it is the least understood. Criminal law classifies rape as a crime against the person along with murder, robbery, and battery. But in at least one respect rape is unique—with few exceptions its perpetrators are male and its victims are female. The gendered nature of rape raises questions of equality and fairness as well as about the scope of individual rights to autonomy, privacy, security, and bodily integrity. Rape is therefore an important subject for political and social philosophy as well as for ethics, feminist philosophy, and the philosophy of law. This collection of original essays by leading philosophers investigates the philosophical dimensions of rape in all of its manifestations: act, crime, practice, and institution. The essays examine such issues as the nature of rape; the wrongfulness and harmfulness of rape; the relation of rape to racism, sexism, classism, and other forms of oppression; and the legitimacy of various rape-law doctrines (such as the corroboration requirement, the marital-rape exemption, and the reasonable-belief defense). Each contributor advances a novel argument and seeks to disentangle the conceptual, evaluative, and empirical issues that arise in connection with the crime. Editor Keith Burgess-Jackson provides a substantive introduction, a history of rape law, two extensive bibliographies, and a detailed index to round out this major addition to a much-needed philosophical discussion of rape. *A Most Detestable Crime* is among the first philosophical anthologies devoted exclusively to the subject of rape—as complex and interesting intellectually as it is pervasive and disturbing socially. It is an essential reference work not only for legal and feminist philosophers, but for feminist scholars and practitioners in every field, including law, medicine, social work, and counseling. This volume will also be of interest to social, political, and legal theorists of every ideological and methodological persuasion.

Sex workers are often the "objects" of study for academics and policy makers. Theories about their lives and the policies that affect their work are usually developed without input from the sex workers themselves, as they are rarely seen as capable of analyzing the social and political world in which they work. In this book, however, sex workers set the tone. Leslie Ann Jeffrey and Gayle MacDonald interview sex workers in three Maritime cities and those who work around them: police, health-care providers, community workers/advocates, members of neighbourhood associations, and politicians. The sex workers discuss such issues as violence and safety, health and risk, politics and policy, media influence, and public perception of the trade, portraying the best and the worst facets of their working lives and expressing sentiments refreshingly at odds with commonly held opinions. Given recent Parliamentary recommendations to decriminalize prostitution, *Sex Workers in the Maritimes Talk Back* represents a timely shift to public discussions about sex work. Engaging and accessible, this book will be of interest to public policy practitioners, students of social and political science, community advocates, police, and sex workers and their families.

The book is designed to be of interest to women's studies students wishing an introduction to a specifically philosophical analysis of the problem of sex objectification, as well as to philosophers interested in the contemporary moral issues of sexism and sex stereotyping.

A highly accessible overview of the central themes of women's studies, suitable for introductory reading in undergraduate courses or for a more general audience's introduction to the meaning of feminism and its relevance as a progressive force in society. The authors tackle six broad topics that dominate the field and are key to understanding women's experiences and prospects: women's bodies, anger & desires, sexuality, internal backlash, feminist methods, & identity politics. The authors consider why there is a resistance to the development of American feminism and women's studies in the academy, with their continuing representation of marginalized, excluded, and silenced voices.

For more than fifteen years, *Nomadic Subjects* has guided discourse in continental philosophy and feminist theory, exploring the constitution of contemporary subjectivity, especially the concept of difference within European philosophy and political theory. Rosi Braidotti's creative style vividly renders a productive crisis of modernity. From a feminist perspective, she recasts embodiment, sexual difference, and complex concepts through relations to technology, historical events, and popular culture. This thoroughly revised and expanded edition retains all but two of Braidotti's original essays, including her investigations into epistemology's relation to the "woman question;" feminism and biomedical ethics; European feminism; and the possible relations between American feminism and European politics and philosophy. A new piece integrates Deleuze and Guattari's concept of the "becoming-minoritarian" more deeply into modern democratic thought, and a chapter on methodology explains Braidotti's methods while engaging with her critics. A new introduction muses on Braidotti's provocative legacy.

This book critically examines the response of the United Nations (UN) to the problem of sexual exploitation in UN Peace Support Operations. It assesses the Secretary-General's Bulletin on Special Protection from Sexual Exploitation and Sexual Abuse (2003) (SGB) and its definition of sexual exploitation, which includes sexual relationships and prostitution. With reference to people affected by the policy (using the example of Bosnian women and UN peacekeepers), and taking account of both radical and "sex positive" feminist perspectives, the book finds that the inclusion of consensual sexual relationships and prostitution in the definition of sexual exploitation is not tenable. The book argues that the SGB is overprotective, relies on negative gender and imperial stereotypes, and is out of step with international human rights norms and gender equality. It concludes that the SGB must be revised in consultation with those affected by it, namely local women and peacekeepers, and must fully respect

their human rights and freedoms, particularly the right to privacy and sexuality rights.

This text emphasizes changing gender roles and relationships, gender identity and an examination of masculinities in midlife and later life. It covers the need to reconceptualize partnership status, in order to understand the implications of both widowhood and divorce for older women and men.
