Glencoe Pre-Algebra is focused, organized, and easy to follow. The program shows your students how to read, write, and understand the unique language of mathematics, so that they are prepared for every type of problem-solving and assessment situation.

The preponderance of males over females in the population of India has been a subject of concern and controversy since the late eighteenth century. This book addresses the fact of, and the reasons for, unbalanced sex ratios among children in present-day rural India and considers some of the cultural links between the present and the past. Barbara Miller examines sex ratios throughout the world to explore how culture affects these ratios, specially among juveniles, and then focuses on India to demonstrate how the practice of female infanticide has altered the proportions of the sexes. A regional and social pattern of infanticide is then uncovered to show that this practice is most prevalent in north-west India and among the higher castes there. The book illustrates the powerful relationship between culture and mortality. Culture often plays an important role in determining those targeted for death; in this case the target group is north Indian girls.

Written in 1937 when the Thurman W. Arnold was a law professor at Yale, the Folklore of Capitalism is a puckish but serious critique of what he saw as the myths of capitalism. Summing up his book in the Preface, the author said, "By the folklore of capitalism I mean those ideas about social organizations which are not regarded as folklore but accepted as fundamental principles of law and economics." The book, which satirizes many beliefs of American laissez-faire society, was a best-seller and brought Mr. Arnold national attention.
