What happens when you've built a great website or app, but no one seems to care? How do you get people to stick around long enough to see how your service might be of value? In *Seductive Interaction Design*, speaker and author Stephen P. Anderson takes a fresh approach to designing sites and interactions based on the stages of seduction. This beautifully designed book examines what motivates people to act. Topics include: **AESTHETICS, BEAUTY, AND BEHAVIOR:** Why do striking visuals grab our attention? And how do emotions affect judgment and behavior? **PLAYFUL SEDUCTION:** How do you create playful engagements during the moment? Why are serendipity, arousal, rewards, and other delights critical to a good experience? **THE SUBTLE ART OF SEDUCTION:** How do you put people at ease through clear and suggestive language? What are some subtle ways to influence behavior and get people to move from intent to action? **THE GAME OF SEDUCTION:** How do you continue motivating people long after the first encounter? Are there lessons to be gained from learning theories or game design? Principles from psychology are found throughout the book, along with dozens of examples showing how these techniques have been applied with great success. In addition, each section includes interviews with influential web and interaction designers.

From South Africa in the nineteenth century to Hong Kong today, nations around the world, including the United States, have turned to

guestworker programs to manage migration. These temporary labor recruitment systems represented a state-brokered compromise between employers who wanted foreign workers and those who feared rising numbers of immigrants. Unlike immigrants, guestworkers couldn't settle, bring their families, or become citizens, and they had few rights. Indeed, instead of creating a manageable form of migration, guestworker programs created an especially vulnerable class of labor. Based on a vast array of sources from U.S., Jamaican, and English archives, as well as interviews, *No Man's Land* tells the history of the American "H2" program, the world's second oldest guestworker program. Since World War II, the H2 program has brought hundreds of thousands of mostly Jamaican men to the United States to do some of the nation's dirtiest and most dangerous farmwork for some of its biggest and most powerful agricultural corporations, companies that had the power to import and deport workers from abroad. Jamaican guestworkers occupied a no man's land between nations, protected neither by their home government nor by the United States. The workers complained, went on strike, and sued their employers in class action lawsuits, but their protests had little impact because they could be repatriated and replaced in a matter of hours. *No Man's Land* puts Jamaican guestworkers' experiences in the context of the global history of this fast-growing and perilous form of labor migration.
