Childhood apraxia of speech (CAS) is a speech disorder in which a child's brain has difficulty coordinating the complex oral movements needed to create sounds into syllables, syllables into words, and words into phrases. Typically, muscle weakness is not to blame for this speech disorder. Parents of children with childhood apraxia of speech commonly say things like, "No one can understand my son," "It looks like he is trying to say the word, but can't get it out," and "He said that word ...

Childhood Apraxia of Speech Causes, Symptoms and Treatment ...

Childhood apraxia of speech (CAS) is an uncommon speech disorder in which a child has difficulty making accurate movements when speaking. In CAS, the brain struggles to develop plans for speech movement. With this disorder, the speech muscles aren't weak, but they don't perform normally because the brain has difficulty directing or coordinating the movements.

Childhood apraxia of speech - Symptoms and causes - Mayo ...

A child with this condition has problems making sounds correctly and consistently. Apraxia is a problem with the motor coordination of speech. It's different from aphasia, which is a problem with the use of words. The speech centers of the brain help plan and coordinate what a child would like to say.

Childhood Apraxia of Speech | Cedars-Sinai

I grew up learning how to speak, while watching the world around me with naturally given speech. Practice with Speech Blues App

Fighting for My Voice: My Life with Verbal Apraxia ...

Childhood Apraxia of Speech is a motor speech disorder that makes it difficult for children to speak. They know what they want to say, but they have a very difficult time verbalizing it. It can take a lot of practice, time, and patience to learn to say sounds and words better. When we speak, our brain sends messages to our mouth.

At last, a parents' guide to understanding, treating, and living with childhood apraxia (CSA). Written in an empathic style by a parent who 'has been there', SPEAKING OF APRAXIA offers hope and practical advice for parents of toddlers to teens with this neurologically-based motor speech disorder. Characterized by difficulties with planning and producing the complex set of movements necessary for intelligible speech, CSA can be a child's only diagnosis or can be accompanied by other special needs such as learning disabilities, Down syndrome, or autism. Parents and professionals will appreciate the author's clear explanations of everything from diagnosing CSA, working with speech language pathologists (SLPs), to understanding how to distinguish it from other speech disorders, and getting appropriate early intervention and special education support. Drawing on the latest research, professionals' insights, her own and other parents' experience, the author covers these important topics: ?I. The Straight Scoop on Speech Basics--CSA definition; An Overview of Speech & Language; Where to Get Help and What to Ask; Your First Appointment with an SLP ?II. Now What?!--Getting, Coping with and Understanding the Diagnosis; Health & Genetics; All about Speech Therapy ?III. Helping Your Child--Complementary and Alternative Medical and Treatment Approaches (Diet, Music, Movement Therapy and More) ?IV. Off to School--Getting Ready; Special Education Ins & Outs; Phonological Awareness; Reading Issues ?V. Coping & Hoping--Dealing with Emotions and Family Life; What the Future May Hold; Networking, Support Groups, and Advocacy ?Appendices: Information on insurance, summer camps and enrichment programs, a history of CSA, and a glossary of terms. SPEAKING OF APRAXIA is a comprehensive and authoritative resource any family, SLP, occupational therapist, or pediatric practice will be glad to own or recommend.

A guide for parents offers advice on how to know if a late-talking child has a speech delay or disorder, providing coverage of such topics as the warning signs of a serious disorder, finding a therapist, working with an educational system, and at-home speech exercises. Reprint. 15,000 first printing.

One of the world's leading authorities on autism suggests a major shift in understanding autism and offers inspiring stories and practical advice drawn from his more than four-decade career.

Laura Mize, pediatric speech-language pathologist and founder of www.teachmetotalk.com, details the hierarchy of imitation skills she teaches to therapists in seminars throughout the country and in her best-selling therapy manuals and DVDs. Many times therapists and parents don't see success with late talking toddlers because the child needs an "in-between" step to help him learn the next component for expressive skill development. Our professional plans can also fail when we use techniques that are too clinical for parents to be able to remember and practice at home. This eight level approach is contained in Building Verbal Imitation in Toddlers.

In this unique and unparalleled book, Laura Baskall Smith, a speech/language pathologist (SLP) specializing in Childhood Apraxia of Speech (CAS) candidly describes her daughter's personal journey with overcoming apraxia while providing expert resources and tips for parents and professionals.

Here's How to Treat Childhood Apraxia of Speech, Second Edition is the most comprehensive textbook available addressing assessment, diagnosis, and treatment of childhood apraxia of speech (CAS). This text is the definitive reference for students and professionals seeking current best practices in treating children with CAS. The book is divided into three parts. Part I defines CAS, describes those characteristics most commonly associated with CAS, and offers guidelines for conducting a thorough motor speech evaluation to support an accurate differential diagnosis. Part II summarizes the principles of motor learning and provides clear guidance for how these principles can be put into practice when working with children with CAS. Part III addresses specific topics of interest to clinicians and students looking for practical ideas on how to address the multifaceted challenges of children with CAS such as vowels, prosody, expressive language, social language, and incorporating phonological awareness in CAS treatment. Additional recommendations are provided for supporting the needs of children with limited verbal output and older children with ongoing communicative challenges, working with parents, developing treatment plans, and writing meaningful goals and objectives. Each chapter of this second edition has been updated to incorporate the most current evidence-based information available on CAS. In addition, five new chapters have been added, including: Principles of Motor Learning and Their Application to Treatment of CAS (Chapter 4)Evidence-Based Treatment Programs for Children with CAS (Chapter 10)Supporting the Needs of Older Children with Ongoing Communicative Challenges (Chapter 15)Using Apps with Children with CAS (Chapter 21)Developing Meaningful Goals for Children with CAS (Chapter 23) Here's How to Treat Childhood Apraxia of Speech, Second Edition will be of value to speech-language pathologists and students looking for practical, evidence-based recommendations for addressing the diverse needs of children with CAS. This title is a volume in Plural's "Here's" How" series.

From breastfeeding to vaccines to sleep, Alice's advice will help you make smart choices so that you can relax and enjoy your baby.

Derived from a conference on clinical dysarthria in San Antonio, in 1990, 19 papers report on clinical and research developments in neuromotor speech disorders for the benefit of speech-language pathologists and researchers, and graduate students in the field. The sections cover theoretical approaches, intelligibility, specific disorders, physiology, and apraxia. Annotation copyrighted by Book News, Inc., Portland, OR

This first-ever book on vowel disorders provides you with an authoritative overview of vowel production disorders affecting speech in children with phonological disorders. Gain reliable clinical advice on methods for investigating, examples of error types from previous studies, and implications for theoretical phonology and therapeutic intervention. - BOOK JACKET.
