Make nursing research approachable with the authoritative resource for nursing graduate students. This best-selling text features the latest methodologic innovations in nursing, medicine, and the social sciences delivered in a user-friendly writing style to help students master research methods, confidently critique research reports, and apply evidence-based findings in clinical practice. The extensively revised 11th Edition retains the helpful features, pedagogy, and clean design that have made the book a classic and introduces two new chapters reflecting the growing importance of applicability, generalizability, relevance, and quality improvement and improvement science. NEW! Quality Improvement and Improvement Science chapter provides methods and frameworks to help students develop and assess improvement projects. NEW! Applicability, Generalizability, and Relevance: Toward Practice-Based Evidence chapter details cutting-edge strategies to meet the growing need for patient-centered, practice-based evidence. UPDATED! Revised content throughout reflects the latest methodologic approaches to ranking evidence, verifying systematic reviews, using meta-aggregation, and more. Critical appraisal guidelines help students focus on specific aspects of a report for the most effective appraisal. Clear, user-friendly writing style introduces concepts logically and clarifies difficult ideas. Specific research tips translate abstract notions into practical strategies to help students confidently apply chapter lessons in real-life situations. Research examples throughout the text illustrate key points and stimulate critical thinking. A comprehensive index provides fast, efficient access to precise information. Tables, figures, and bulleted summaries reinforce essential chapter concepts at a glance.

This is the first comprehensive exploration of ancient and modern tyranny in the history of political thought. Waller R. Newell argues that modern tyranny and statecraft differ fundamentally from the classical understanding. Newell demonstrates a historical shift in emphasis from the classical thinkers' stress on the virtuous character of rulers and the need for civic education to the modern emphasis on impersonal institutions and cold-blooded political method. The turning point is Machiavelli's call for the conquest of nature. Newell traces the lines of influence from Machiavelli's new science of politics to the rise of Atlanticist republicanism in England and America, as well as the totalitarian regimes of the twentieth century and their effects on the present. By diagnosing the varieties of tyranny from erotic voluptuaries like Nero, the steely determination of reforming conquerors like Alexander the Great and Julius Caesar and modernizing despots such as Napoleon and Ataturk to the collectivist revolutions of the Jacobins, Bolsheviks, Nazis, and Khmer Rouge, Newell shows how tyranny is every bit as dangerous to free democratic societies today as it was in the past.

This report is the twelfth assessment of the National Institutes of Health National Research Service Awards program. The research training needs of the country in basic biomedical, clinical, and behavioral and social sciences are considered. Also included are the training needs of oral health, nursing, and health services research. The report has been broadly constructed to take into account the rapidly evolving national and international health care needs. The past and present are analyzed, and predictions with regard to future needs are presented.

This leading textbook of nursing research, written by two of the most renowned experts in the field, is now published in full-colour, and this, the 4th edition has now been updated throughout to reflect today's evidence-based practice.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

This book is a clear and practical guide to help students develop critical thinking, writing and reflection skills. It explains what critical thinking is and how students should use it throughout their nursing programme. This new edition also provides an innovative new framework that helps students appreciate different levels of critical thinking and reflection to help nursing students appreciate the requirements of degree level study. The book demonstrates the transferable nature of critical thinking and reflection from academic contexts to the real practice of nursing. Key features Clear and straightforward introduction to critical thinking directly written for nursing students, with chapters relating the subject to specific study and practice contexts Student examples and scenarios throughout, including running case studies from four nursing students and further annotated examples of student's work on the website Each chapter is linked to the new NMC Standards and Essential Skills Clusters

Writing for Publication in Nursing and Healthcare helps readers develop the skills necessary for publishing in professional journals, presenting conference papers, authoring books, research reports, and literature reviews, and more. This comprehensive resource covers all aspects of writing for publication, including good practice in reviewing, the editorial process, ethical aspects of publishing, and the rules that govern academic writing, publishing, and dissemination. Assuming no prior expertise in the subject, the text uses an accessible, step-by-step approach that incorporates a wealth of real-life examples, hands-on activities, and valuable tips throughout. The second edition reflects the

latest developments, guidelines, and practices both in academic publishing and in research assessment and dissemination. New and updated material covers the increasing use of social media to disseminate published work, post-publication scrutiny, contemporary issues surrounding predatory or unethical publishers, and new requirements for research registration and submission data. Edited by leading experts in the field, this practical 'how to' guide: Describes the basics of writing for publication and how to get started Includes numerous examples illustrating the practical ways abstracts, papers, book reviews, and other publications are written and disseminated Discusses current issues and developments, such as the impact of major ethics organisations on publishing worldwide and the rise of online journals, blogging, and podcasting Features contributions by internationally recognised academics and practitioners Explains how to turn research reports and other assignments into publishable works The definitive introduction to the subject, *Writing for Publication in Nursing and Healthcare* is a must-have for all nurses and healthcare professionals, as well as undergraduate and graduate students in nursing and healthcare programs who are required to write for publication.

Results are presented of a study of nursing and nursing education that focused on the need for continued federal support of nursing education, ways to attract nurses to medically underserved areas, and approaches to encourage nurses to stay in the profession. Findings are presented on whether the aggregate supply of generalist nurses will be sufficient to meet future demand, and how changes that could occur in the health care system might affect demand. Attention is also directed to: how the current and future supply of nurses may be influenced by the costs of nursing education and the sources of education financing; and education for generalist positions in nursing. In addition, the supply and demand situation for nurses educationally prepared for advanced professional positions in nursing is examined. The influence of employer policies and practices in utilization of nursing resources on demand and supply is also addressed. Finally, areas in which further data and studies are needed to better monitor nursing supply and demand are identified. In addition to 21 recommendations, appendices include information on Nursing Training Act appropriations, state reports on nursing issues, certificates for specialist registered nurses, projections of registered nurse supply and requirements, and doctoral programs in nursing. (SW)

This book gives a rounded understanding of the complexities of staffing and care delivery without focusing on a narrow view of traditional staffing. This books provides easy to understand examples to obtain quality outcomes, staff satisfaction, and patient satisfaction and safety.

Designated a Doody's Core Title! "Writing for publication is essential for disseminating nursing knowledge, and this book will surely prepare budding authors and serve as a resource for experienced authors.
