using the Oracle Application Development Framework. From the exclusive publishers of Oracle Press books, Oracle JDeveloper 10g Handbook will have you developing Java-based applications in no time.

Asynchronous JavaScript and XML (Ajax) is a web technique used to transfer data between a browser and server asynchronously without posting the web page to the server. "Asynchronously" implies that the processing of the web page continues while the Ajax request is sent to the server and a response is received from the server. The web page, or section(s) of the web page, is refreshed with the Ajax response without reposting the web page. Ajax has the following advantages over non-Ajax web applications. - Reduced response time and reduced server load, as the complete web page is not reposted. - Reduced bandwidth of web applications as only data is transferred and the HTML format is applied in the browser. - Separation of data, format and style. The book covers web search and RSS Feed with Ajax as well as form validation with Ajax frameworks for Java, JSP, JSF, and PHP. It discusses using Ajax in Oracle JDeveloper and is IDE based. JDeveloper has the following advantages over Eclipse IDE. - JDeveloper 11g provides an integrated JavaScript Editor for Ajax/Web development. - It also provides a PHP extension. - JDeveloper has a built-in support for JSF and for JDBC.

Master Oracle WebCenter 11g Transform your organization into a personalized, user-focused workplace using the detailed information in this comprehensive

Download Free Oracle Jdeveloper 11g Handbook A Guide

Oracle Press guide. Oracle WebCenter 11g Handbook shows you how to build Enterprise 2.0 applications that facilitate collaboration and foster innovation. You'll work with task flows and content systems, employ social networking tools, develop portals and composite applications, and deploy runtime customization. Debugging, security, and application tuning are also covered in this practical resource.

Develop, test, and deploy dynamic enterprise applications, portals, and portlets
Design data-backed rich Internet applications using Oracle JDeveloper 11g and Oracle WebLogic Server
Work with Oracle Content Server and Oracle Secure Enterprise Search
Customize applications at runtime using Oracle Composer and metadata services
Use the resource catalog to deliver personalized search results to end users
Integrate RSS feeds, forums, wikis, and blogs with Oracle WebCenter social computing services
Implement the latest Oracle Application Development Framework security tools
Extend functionality using mashups, composite applications, and third-party add-ons
Understand the Web 2.0 and portal technologies behind Oracle Fusion Applications
