As one of the most recognizable images in science, the periodic table is ingrained in our culture. First drawn up in 1869 by Dmitri Mendeleev, its 118 elements make up not only everything on our planet but also everything in the entire universe. *The Periodic Table* looks at the fascinating story and surprising uses of each of those elements, whether solid, liquid or gas. From the little-known uses of gold in medicine to the development of the hydrogen bomb, each entry is accompanied by technical data (category, atomic number, weight, boiling point) presented in easy-to-read headers, and a colour coding system that helps the reader to navigate through the different groups of elements. A remarkable display of thought-provoking science and beautiful photography, this guide will allow the reader to discover the world afresh.

Imagine how much you would learn if you could converse with 64 of the brightest minds in marketing. Now imagine if those conversations were focused on all the essential elements that go into being a top-notch chief marketing officer and organized into seven logical, intuitive categories. Now you can stop imagining, and start reading *The CMO's Periodic Table*, an essential resource for the modern marketer. Over the last five years, thanks in large part to his friends at The CMO Club, author Drew Neisser has interviewed over 100 marketing leaders at prominent companies such as American Express, Audi, Belkin, Black Duck Software, Converse, College Humor, D&B, Dow, and many more. These interviews, 64 of which are highlighted in this book, reflect the fundamental diversity of challenges and subsequent solution sets deployed by each. Though these interviews don't yield a magic formula, they offer something a bit more profound and definitely more fundamental—a compendium of elements that every marketer has or will need to examine in the very near future. Organized into a CMO-worthy periodic table modeled on the classic organization of the chemical elements, the chapters progress from basic challenges like research and strategy, to internal issues like culture change and managing up, to advanced, highly volatile subjects like risk-taking and changing agencies.

One of Italy's leading men of letters, a chemist by profession, writes about incidents in his life in which one or another of the elements figured in such a way as to become a personal preoccupation

NATIONAL BESTSELLER "Terrific." — BEN SHAPIRO "Outstanding." — DANA LOESCH The Left is on the attack, and the war for our country is at a crucial tipping point. Liberals know they're within reach of radically transforming America. They don't like the U.S. Constitution. They're allergic to Americans' "gun culture." They find our faith and our devotion to family distasteful. And our commitment to liberty positively sends them into a panic. As soon as the Democrats get power anywhere, they stand ready to throw our God-given rights under the bus of political correctness, transgender insanity, and socialism (the economic system that always promises equality and utopia, but somehow always delivers resentment, poverty, and decay). So how can we tip the momentum back in our favor? How can we fight effectively for freedom, the U.S. Constitution, limited government, faith and family, and the survival of the American Republic? Liz Wheeler to the rescue! The popular host of One America News Network's "Tipping Point with Liz Wheeler" is a brilliant and highly effective debater who shows how we can go on the rhetorical attack against the Left—and win—with a multi-technique program for catching the Left in their inconsistencies and under-handed schemes and skewering them for their bold-faced lies. In *Tipping Points: How to Topple the Left's House of Cards*, Liz Wheeler identifies the five "Tipping Points" where liberals are poised to win, trains you in her proven debating techniques, and deputizes you to take up arms in the fight for our nation's heart and soul. It's training you need right now, today. Our country is at a tipping point. And make no mistake—if the Left isn't defeated, they're taking down America.
