Covering every area of the ABPN board exam, the 3rd Edition of "Psychiatry Test Preparation and Review Manual, " by Drs. J. Clive Spiegel and John M. Kenny, includes 1,100 questions, video vignettes, and an online timed assessment to prepare you for certification or recertification success. You'll know exactly what to expect when exam day arrives, thanks to current coverage of the latest research in both psychiatry and neurology, as well as a format that precisely mimics all aspects of the written exam.

Featuring more than 1,000 questions, video vignettes, and an online timed assessment, Psychiatry Test Preparation and Review Manual, 4th Edition, remains your #1 choice to prepare for successful exam results in both psychiatry and neurology. This trusted review covers every area of the ABPN board exam, and is also an excellent resource for MOC and PRITE study. Updated content includes questions regarding epidemiology, sexuality and gender, and substance addiction, as well as revisions to match DSM-5 criteria. Features six tests of 150 multiple-choice questions each, as well as 160 multiple-choice questions related to 25 case vignette videos. Allows you to see results broken down by topic online, so you can target areas needing further study. Bookmarking and score archiving are also available online. Permits you to exclude topics which are not included on the MOC, such as neuroscience and neurology, so you can more narrowly focus your study. Brings you up to date with new information in epidemiology, LGBT sexuality and gender, and substance addiction, as well as the most current DSM-5 criteria. New case vignette videos also reflect these additional key areas. Gives clear explanations for both insufficient/incorrect and correct answers, and provides recommended readings from key textbooks.

Updated to reflect all of the latest research in psychology and neurology, Psychiatry Test Preparation and Review Manual, 2nd Edition precisely mirrors the written ABPN board exam so you can expertly prepare and achieve your highest score. Enhance your preparation with recommended readings from key textbooks in the field. Understand why your answers are correct or incorrect through detailed explanations of each possible response.

Covering every area of the ABPN board exam, the 3rd Edition of Psychiatry Test Preparation and Review Manual, by Drs. J. Clive Spiegel and John M. Kenny, includes 1,100 questions, online video vignettes and an online timed assessment to prepare you for certification or recertification success. You'll know exactly what to expect when exam day arrives, thanks to current coverage of the latest research in both psychiatry and neurology, as well as a format that precisely mimics all aspects of the written exam. Allows you to exclude topics which are not included on the MOC, such as neuroscience and neurology, so you can more narrowly focus your study. Gives clear explanations for

both insufficient/incorrect and correct answers, and provides recommended readings from key textbooks. Reflects the latest research and clinical practice in both psychiatry and neurology. NEW! Eight new video vignettes featuring patient interviews, each with accompanying multiple-choice questions. NEW! All questions relating to diagnostic criteria have been updated to the DSM-5.

Updated to reflect all of the latest research in psychology and neurology, Psychiatry Test Preparation and Review Manual, 2nd Edition precisely mirrors the written ABPN board exam so you can expertly prepare and achieve your highest score. This psychiatry Q book now features over one thousand questions including an online component with all MCQs from the text, ensuring you know exactly what to expect when exam day arrives. Enhance your preparation with recommended readings from key textbooks in the field. Understand why your answers are correct or incorrect through detailed explanations of each possible response. Study as effectively as possible with 300 brand-new questions that match the current exam format, as well as 160 clinical vignette questions that are stylistically based on those appearing on the ABPN board exam and other standardized tests. Experience a realistic exam simulation online at www.expertconsult.com, where you can take timed assessment tests as well as untimed practice tests, target specific areas of weakness, exclude topics not included on the MOC exam (such as child psychiatry and neurology), and more!

The first comprehensive psychiatry review textbook, designed expressly for the Canadian market, Psychiatry Review and Canadian Certification Exam Preparation Guide is the resource residents and psychiatrists need to master the qualifying examinations in psychiatry of the Royal College of Physicians and Surgeons of Canada. These exams are required for certification both for graduating residents and most foreign-trained psychiatrists seeking to practice in Canada. This new volume, based on The American Psychiatric Publishing Board Review Guide for Psychiatry, has been carefully edited to include only material relevant to the Canadian exam. References have been taken from both the U.S. and Canadian psychiatric literature, and laboratory units, medication names and doses, and the language used have been edited to be consistent with Canadian psychiatry. The volume takes the reader from the basic sciences comprising the foundation of psychiatry, through the psychiatric interview and other diagnostic topics, to syndrome-specific chapters paralleling DSM-IV-TR, and finally to current treatment options. Rounding out the review is a 200-question practice exam that reflects the structure of the actual board examinations. Although no substitute for quality medical and residency training, Psychiatry Review and Canadian Certification Exam Preparation Guide will help the prospective exam-taker ameliorate weaknesses and enhance strengths in preparation for a successful exam experience.

Geriatric psychiatry is a relatively young discipline within the field of North American psychiatry. The development of a workforce to meet the needs of an aging population has been identified as an urgent priority, but there is still much we don't know about fulfilling the mental health needs of older adults. For Mark J. Rapoport, geriatric psychiatrists must assess and treat patients today in face of the limitations of what we know, but also be armed with enthusiasm to create novel ways of impacting on the quality of life of older patients with mental illness. The chapters in this book include case scenarios, concise point-form summaries of diagnostic and treatment approaches, up-to-date evidence syntheses, discussions of controversies, and a series of practical and thought-provoking questions and answers. Geriatric Psychiatry is a succinct and advanced review of geriatric psychiatry that will help clinicians improve the psychiatric care of an aging population.

The field of psychiatry is evolving rapidly specifically in the areas of classification of many psychiatric disorders, psychopharmacology and psychotherapeutics. The new Diagnostic and Statistical Manual of Mental Disorders: DSM-5 which was introduced in 2013 forms the basis of the new classification system in psychiatry. The American Board of Psychiatry and Neurology is also in the process of phasing in DSM-5 criteria to the board examination, such that by 2017 the examination material will exclusively reflect the new manual. As psychiatric trainees and psychiatrists prepare for their certification and recertification examinations using the new classification system, a new board review textbook is imperative to address these changes in order to prepare them for the certification examinations as well as for their clinical practice. To help with this process we have compiled a list of 1000 questions and answers in psychiatry and neurology using the most current information available in the field and using the DSM 5 classification system. This book has been specifically written for the busy professional who does not have the time to access numerous resources necessary to prepare for professional examinations.

It is a daunting task to distill a psychiatrist's education and training into a single, comprehensive resource, but that is precisely what this review guide does to thoroughly prepare candidates taking the American Board of Psychiatry and Neurology Examination in Psychiatry.
