This cultural history of Mussolini's dictatorship discusses the meanings of modernity in interwar Italy. The work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the European and national crises.

First published in 1989, this collection of essays brings into focus the history of a specific form of violence – that of representation. The contributors identify representations of self and other that empower a particular class, gender, nation, or race, constructing a history of the west

as the history of changing modes of subjugation. The essays bring together a wide range of literary and historical work to show how writing became an increasingly important mode of domination during the modern period as ruling ideas became a form of violence in their own right. This reissue will be of particular value to literature students with an interest in the concept of violence, and the boundaries and capacity of discourse.

The results of the last European Elections of 2014 confirmed the rise of right and far right 'populist' parties across the EU. The success of a range of parties, such as Denmark ' s Dansk Folskeparti, Slovenia ' s Slovenska demokratska

Braska, France 's Front National, Greece ' s Golden Dawn, the United Kingdom Independence Party, Beppe Grillo ' s Five Star Movement in Italy and the Austrian FPÖ, has been perceived as a political wave which is transforming the face of the European Parliament, and challenging at some level the hegemony of the 'big four' well-established European political forces that lead the Strasbourg ' s assembly: the ALDE, EPP, S&D and Greens/ALE. As 'populism' has become a major issue in many EU countries, this collection aims to provide a critical understanding of related trends and recommend ways in which they can be challenged both in policy and praxis, by using the gender-race-

fields of knowledge), religious fractures and unrest, the scientific revolution, and the new perception of reality expressed through a transformation of the visual arts: these are some of the changes experienced by Italian Jews which they were affected by in their own particular way. This book explores the complex relations between Jews and the world that surrounded them during a critical period of European civilization. The relations were rich, problematic, and in some cases strained, alternating between opposition and dialogue, osmosis and distinction.

Objectives of MPAs with indicators that measure management effectiveness. The framework and indicators were field-tested in 18 sites around the world, and results of these pilots were incorporated into the guidebook. Published as a result of a 4-year partnership of IUCN's World Commission on Protected Areas-Marine, World Wildlife Fund, and the NOAA National Ocean Service International Program Office.

Do virtual museums really provide added value to end-users, or do they just contribute to the abundance of images? Does the World Wide Web save endangered cultural heritage, or does it foster a society with less variety? These and other related questions are

raised and answered in this book, the result of a long path across the digital heritage landscape. It provides a comprehensive view on issues and achievements in digital collections and cultural content.

This book examines the Eurozone crisis in light of theoretical and empirical evidence. The first half explores specific theoretical contributions within a framework of growth theory models to examine the two major pillars of the European construction, the European Central Bank and the Maastricht Treaty, and seeks to explain why they are theoretically wrong. The second half presents results of counterfactual simulations using the Oxford Econometric model and estimates

Revised Eurozone
What the Eurozone has lost in terms of economic and social cost from 2002 to 2014 as a consequence of the super-evaluation of the Euro and the Maastricht Treaty parameters being mistakenly fixed and pursued. Finally, the author supports the urgent need to refund the European Union, up-dating The Maastricht Treaty and the ECB statute to build three concentric circles: the USE (United States of Europe), the EU (European Union), the EAFTDA (Europe/Africa Free Trade and Development Area).

‘ Our greatest blessings come to us by way of mania, provided it is given us by divine gift, ’ – says Socrates in Plato ’ s Phaedrus.

Certain forms of alteration of consciousness, considered to be inspired by supernatural forces, were actively sought in ancient Greece. Divine mania comprises a fascinating array of diverse experiences: numerous initiates underwent some kind of alteration of consciousness during mystery rites; sacred officials and inquirers attained revelations in major oracular centres; possession states were actively sought; finally, some thinkers, such as Pythagoras and Socrates, probably practiced manipulation of consciousness. These experiences, which could be voluntary or involuntary, intense or mild, were interpreted as an invasive divine power within one's mind, or illumination granted by a

Super-human being. Greece was unique in its attitude to alteration of consciousness. From the perspective of individual and public freedom, the prominent position of the divine mania in Greek society reflects its acceptance of the inborn human proclivity to experience alteration of consciousness, interpreted in positive terms as god-sent. These mental states were treated with cautious respect, and in contrast to the majority of complex societies, ancient and modern, were never suppressed or pushed to the cultural and social periphery.

16 volumes of that immense work, the story of the Hebrew book is scattered, and its constituent parts are presented, as is fitting, in an encyclopedia manner. For the purpose of this book, all that information was gathered, re-edited and re-organized to present this fascinating subject to the reader in a form which, to quote the biblical phrase about an early piece of Hebrew writing, is "plain upon the tables, that a man may read it swiftly." Clearly, the present editors are entirely responsible for the material as it appears in this volume.

Economists occupy leading positions in many different sectors including central and private banks, multinational corporations,

the state and the media, as well as serving as policy consultants on everything from health to the environment and security. Power and Influence of Economists explores the interconnected relationship between power, knowledge and influence which has led economics to be both a source and beneficiary of widespread power and influence. The contributors to this book explore the complex and diverse methods and channels that economists have used to exert and expand their influence from different disciplinary and national perspectives. Four different analytical views on the role of power and economics are taken: first, the role of economic expert discourses as power devices for

Research on the formation of influential expertise; second, the logics and modalities of governmentality that produce power/knowledge apparatuses between science and society; third, economists as involved in networks between academia, politics and the media; and fourth, economics considered as a social field, including questions of legitimacy and unequal relations between economists based on the detention of various capitals. The volume includes case studies on a variety of national configurations of economics, such as the US, Germany, Italy, Switzerland, Greece, Mexico and Brazil, as well as international spaces and organisations such as the IMF. This book provides innovative research perspectives for students
