What are the components of high-quality after-school care for children ages 5-12? How can we evaluate these programs? These are the challenges facing caregivers, schools, agencies, and parents as after-school programs proliferate. The School-Age Care Environment Rating Scale®, Updated Edition provides an easy-to-use resource for defining and assessing the quality of both public and private programs caring for school-age children during out-of-school time. This updated, spiral-bound edition is re-formatted so that each item appears on its own page, along with Notes for Clarification and Questions. The expanded scoresheet can be copied from the book or downloaded from the TC Press website: www.tcpress.com. Selected revised items make scoring more accurate and informative. The SACERS Updated Edition consists of 47 items, organized under 7 categories: Space and Furnishings Health and Safety Activities Interactions Program Structure Staff Development Special Needs Supplementary Items The SACERS Updated Edition is designed to be comprehensive in coverage and easy to use. Instructions for using the scale provide options for self-assessment in addition to formal assessments. Who should use the SACERS? Program directors Organizations, states, and agencies doing QRIS and continuous improvement evaluations School districts Program funders School principals Community-based out-of-school programs States receiving Race to the Top funds Teachers Teacher educators Researchers

The long-anticipated new version of the internationally recognized Early Childhood Environment Rating Scale®, ECERS-3, focuses on the full range of needs of preschool- and kindergarten-aged children. This widely used, comprehensive assessment tool measures both environmental provisions and teacher-child interactions that affect the broad developmental needs of young children, including: Cognitive Social-emotional Physical Health and safety ECERS-3 also includes additional items assessing developmentally appropriate literacy and math activities. Designed for preschool, kindergarten, and child care classrooms serving children 3 through 5 years of age, ECERS-3: Provides a smooth transition for those already using ECERS-R. Emphasizes the role of the teacher in creating an environment conducive to developmental gains. Is designed to predict child outcomes more accurately and with greater precision. Provides a stronger method of distinguishing between good and truly excellent programs. Offers a complete training program with ongoing support available at the Environment Rating Scales Institute (ERSI) website (www.ersi.info). ECERS-3 is appropriate for state and district-wide QRIS and continuous improvement; program evaluation by directors and supervisors; teacher self-evaluation; monitoring by agency staff; and teacher education. The established reliability and long term evidence of validity of the ERSI family of instruments make this new version of ECERS particularly useful for RTTT-ELC accountability and research. Suitable for use in inclusive and culturally diverse programs, ECERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Literacy Learning Activities Interaction Program Structure

Increasing numbers of children are participating in after-school programs, and with more federal and state funding the number of such programs is likely to grow. This growth has been occurring, however, with little guidance as to what program features or practices might be most helpful in nurturing the educational achievement, emotional development, and health of the children involved. This book helps fill that need for guidance by offering a set of 18 model practices against which after-school programs can be evaluated. The authors provide ways to score adherence to the criteria, from excellent to inadequate; survey forms for collecting the information to assign these grades; and an illustrative application of their approach to a set of real-world after-school programs.

Does your afterschool program have the WOW factor? Create a high quality school-age program that is exciting, inviting, and reflects the interests, abilities, and needs of the children. Whether your program operates before or after school, on non-school days, during the summer, or overnight, you can create a dynamic environment where everyone will enjoy spending time. This book is filled with hundreds of ideas—from setting up a quiet reading nook to tackling clutter—reflecting the authors' years of experience and hundreds of visits to a variety of school-age programs. It takes you through all of the considerations that affect your program and then lays out a process to help you improve the three dimensions of a school-age environment. Temporal: Establish schedules, routines, rules, and learning opportunities to meet children's needs Interpersonal: Facilitate the relationships and social interactions of children, staff, families, and the greater community Physical: Create sensory-rich indoor and outdoor spaces Linda J. Armstrong and Christine A. Schmidt are experienced educational consultants who serve children and youth programs throughout the United States.

The fourth edition contains guidelines on the development and evaluation of the health and safety of children in early care and education settings. This guide features 10 chapters of more than 650 standards and dozens of appendixes with valuable supplemental information, forms, and tools. Building on extensive feedback from the field as well as vigorous new research on how best to support infant and toddler development and learning, the authors have revised and updated the widely used Infant/Toddler Environment Rating Scale. ITERS-3 is the next-generation assessment tool for use in center-based child care programs for infants and toddlers up to 36 months of age. ITERS-3 focuses on the full range of needs of infants and toddlers and provides a framework for improving program quality. Further, the scale assesses both environmental provisions and teacher-child interactions that affect the broad developmental milestones of infants and toddlers, including: language, cognitive, social-emotional and physical development, as well as concern for health and safety. ITERS-3 is appropriate for state- and district-wide QRIS and continuous quality improvement, program evaluation by directors and supervisors, teacher self-evaluation, monitoring by agency staff, and teacher training programs. The established reliability and validity of the scale make it particularly useful for research and program evaluation. While the approach to assessing quality and the scoring process remain the same for the new ITERS-3, users will find the following improvements informed by extensive use of the ITERS in the field and by the most recent research: Enhanced focus on interactions and the role of the teacher. Six new language and literacy items. A new item on beginning math experiences. Expanded age range to include children from birth to 36 months. A new approach to scoring based solely on observation of ongoing classroom activity (3-hour time sample). The elimination of the parents/staff subscale and teacher interviews, freeing up time for observing more actual classroom practice. Improved indicator scaling, providing more precise and useful scores for use in professional development and self-improvement. Reduced emphasis on the number of materials, along with greater emphasis on how materials are used to encourage learning. Suitable for use in inclusive and culturally diverse programs, ITERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Books Activities Interaction Program Structure

Every preschool, kindergarten, and primary teacher should have SUPPORTING PLAY IN EARLY CHILDHOOD: ENVIRONMENT, CURRICULUM, ASSESSMENT, 3rd Edition, in their personal library. Readable yet thorough, this book and supporting materials provide a comprehensive approach to designing, implementing, and evaluating play-based programs for young children. The first two chapters situate play in the context of historical and current theory while providing information about the role of play in the growth and development of the child. Current topics such as connections to neurological research, culture and diversity, play for children with special needs, outdoor learning settings, STEM, Reggio Emilia, and the importance of interactions with adults are addressed. Symbols throughout the text show the alignment of the content with NAEYC and CEC/DEE standards. Sample lesson plans are in the appendix. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

FDORS consists of 32 items, organized under six major headings: Space and Furnishings for Care and Learning -- Basic Care -- Language and Reasoning -- Learning Activities -- Social Development -- Adult Needs. Eight additional items are included for rating a day care home's provisions for special-needs children. Each book contains one score sheet. Packages of 30 score sheets can be ordered separately.

Perceptual-Motor Activities for Children: An Evidence-Based Guide to Building Physical and Cognitive Skillscontains 200 station activities that you can use to develop perceptual-motor skills in kids from preschool through elementary grades. The activities can be used in a 32-week sequential program or individually. You also receive a web resource that offers activity cards, bonus activities, active learning cards, audio tracks, a record sheet, and other tools.
