This updated edition reflects changes and developments in the field of macroeconomics. This is a solved-problems outline for standard undergraduate and graduate economics courses in colleges and MBA programs. New topics included are national income accounting, lags in demand stabilization, the Phillips curve and monetarist macroeconomics. Over four-hundred solved and supplementary problems are included.

The learn-by-doing approach of this powerful study guide helps students master one of the most difficult courses required in most colleges and universities--traditionally one of the most important courses in all economics and business curricula. Every chapter fully illustrates theories, principles or background information and includes multiple-choice review questions with answers.

More than 100,000 copies sold in its first 2 editions; Over 93,000 students enrolled; Translated into 12 languages; Corresponds to standard college economics courses; Use with most macroeconomics texts; Includes a new chapter on economic growth.
