Your Space is a three-level course designed to motivate students as they change and grow. The Level 3 Teacher's Book is designed to give teachers full support with lesson preparation to enable an enjoyable classroom experience. It provides extra activities linked to the project work for each unit. With comprehensive explanations and plenty of ideas for how to exploit the Student's Book material to maximum benefit, it also contains all the transcripts and answer keys for the activities from both the Student's Book and Workbook. The Tests CD contains an Entry and Exit Test, and Skills Tests and Unit Tests for each unit.

From Snorkelers to Scuba Divers in the Elementary Science Classroom: Strategies and Lessons That Move Students Toward Deeper Learning By John Almarode and Ann M. Miller. Inspire a deep and lasting love of science in young students With so much attention paid to student performance in science, it is imperative for teacher to foster prolonged interest and deep conceptual understanding from an early age. From Snorkelers to Scuba Divers combines the latest findings in the science of learning with student and teacher-tested techniques to provide the framework for encouraging young learners to shed their snorkels and plunge into the world of science. Readers will find: Evidence-based, research-driven strategies that encourage both deep thinking and conceptual understanding Classroom examples that demonstrate each aspect of the standards-based instructional framework in action Professional development tasks that provide teachers with support in implementing strategies for students at all levels, from surface to deep

Test of FAITH is an innovative new resource designed for use by small groups wishing to explore big issues raised by science for both faith and ethics. It introduces a wide range of hot topics including: Are science and Christianity in conflict? Has the Big Bang pushed God out of the universe? What does 'creation' mean? Is evolution compatible with religious faith? Is cloning ethical? Are humans no more than biological machines? Test of FAITH is designed to enable non-specialists to join the discussion. It allows small groups to unpack these issues, and discuss them at a level and pace that suits the group. It is flexible so that users can choose the topics that they want to cover, and encourages open discussion of a range of views. This Leader's Guide accompanies the Test of FAITH DVD, and provides all the content of the Study Guide plus suggested responses to questions, critical background information, and opportunities for taking these issues further. Samples and DVD trailer at www.testofaith.com

This brief provides a complete yet concise description of modern dive computers and their operations to date in one source with coupled applications for added understanding. Basic diving principles are detailed with practical computer implementations. Interrelated topics to diving protocols and

operational procedures are included. Tests, statistics and correlations of computer models with data are underscored. The exposition also links phase mechanics to dissolved gases in modern decompression theory with mathematical relationships and equations used in dive computer synthesis. Applications focus upon and mimic dive computer operations within model implementations for added understanding. This comprehensive resource includes a complete list of dive computers that are marketed and their staging models, as well as a complete list of diveware marketed and their staging algorithms, linkage of pertinent wet and dry tests to modern computer algorithms, a description of two basic computer models with all constants and parameters, mathematical ansatz of on-the-fly risk for surfacing at any dive depth, detailing of statistical techniques used to validate dive computers from data, and a description of profile Data Banks for computer dive model correlations. The book will find an audience amongst computer scientists, doctors, underwater researchers, engineers, physical and biosciences diving professionals, explorers, chamber technicians, physiologists and technical and recreational divers.
