Patternmaking for Underwear Design 2nd Edition is a comprehensive patternmaking guide suitable for students, teachers and the industry. Step-by-step instruction is matched with superb illustrations, and all measurements are provided in both metric and Imperial scales. This book introduces common bra patternmaking methods widely used in the industry and offers the authors own innovative bra patternmaking method entitled Shin's method. This new method includes two intermediate blocks developed using the flat patternmaking concept. Shin's method enables novice patternmakers to create various bra designs from scratch with commercial fit quality. Patternmaking for Underwear Design 2nd edition elaborates the direct bra drafting further, thus the readers whose bra size is not 34B (75B) could draft their own bra according to their body measurements. Bra grading method is also added to the 2nd edition to enable the readers to grade the bra from 34B.

Provides information for designing and sewing bras using new and advanced techniques and materials, including pre-molded and cut-and-sew foam.

Learn to make your characters unique, compelling and lifelike with these 75 exercises for all skill levels, including beginners. Topics include tools and materials; shapes; personalities; facial expressions; body language; character interaction; and costuming. Author Bev Johnson guides you through a variety of questions to explore not only the kinds of characters you want to create, but also the relationships between them, such as who their friends and enemies are, what their personality distinctions are, etc. so you can you can create truly interesting characters.

This is the only authoritative textbook on metabolic measurement of animals, ranging in mass from fruit flies to whales. It integrates a rigorous theoretical background with detailed practical guidelines for making actual measurements in the field and laboratory.

The Bare Essentials series is an invaluable resource for anyone entering into the field of lingerie design. This volume summarizes the basics of bra design, from sewing and construction to drafting and pattern grading; introducing these subjects in a manageable capacity.

A Sunday Times (UK) Book of the Year Shortlisted • Society of Authors' Somerset Maugham Award A BBC Radio 4 Book of the Week The best-selling author of The Secret Lives of Color returns with this rollicking narrative of the 30,000-year history of fabric, briskly told through thirteen charismatic episodes. From colorful 30,000-year-old threads found on the floor of a Georgian cave to the Indian calicoes that sparked the Industrial Revolution, The Golden Thread weaves an illuminating story of human ingenuity. Design journalist Kassia St. Clair guides us through the technological advancements and cultural customs that would redefine human civilization—from the fabric that allowed mankind to achieve extraordinary things (traverse the oceans and shatter athletic records) and survive in unlikely places (outer space and the South Pole). She peoples her story with a motley cast of characters, including Xiling, the ancient Chinese empress credited with inventing silk, to Richard the Lionhearted and Bing Crosby. Offering insights into the economic and social dimensions of clothmaking—and countering the enduring, often demeaning, association of textiles as “merely women’s work”—The Golden Thread offers an alternative guide to our past, present, and future.

Beginning with the fundamentals of carpentry work within a domestic construction setting, this book outlines which tools are required, and examines their care and proper use before covering the interpretation of technical drawings It goes on to explain a wide range of first-fixing operations prior to plastering, and second-fixing operations afte plastering. Each chapter covers the subject in great detail, with step-by-step illustrations and text to provide the reader with a complete picture of the sequence of work required to carry out each job. Goring's Manual of First and Second Fixing Carpentry has been updated to take recent developments in the building trades into account, and is also fully up to date with current industry best practice. Printed in full colour throughout, new chapter has been incorporated to address the sharpening of traditional saws. The breadth of coverage and easily accessible 'how-to' approach makes this book an ideal resource for apprentices taking NVQs and those following Construction Awards within the Wood Occupations from City & Guilds/Construction Skills The technical detail and practical focus ensures that this book will be a vital purchase for all students, and an essential reference for any experienced carpenter or joiner.

This book addresses the rising productivity gap between the global frontier and other firms, and identifies a number of structural impediments constraining business start-ups, knowledge diffusion and resource allocation (such as barriers to up-scaling and relatively high rates of skill mismatch).

The design of lingerie is often seen as a mystery, even by professionals working in other sectors of the fashion industry. This book explains the processes at work and the many unexpected influences that inform the choice of color, silhouettes, and decoration. The book documents the rise of the deluxe lingerie brand. This interest in luxury labels has led many young designers to chose lingerie as a creative outlet – conscious of fashion, but also with a clear view of their own 'lingerie world'. The book features the work of 30 lingerie designers from around the world, bringing out the individuality of each designer and providing a compelling insight into their working methods. Beautifully illustrated throughout, it presents inspirational images from the designers' collections alongside their sketches and mood boards. In this book, Pamela Powell takes a very practical approach, showing how to design and construct lingerie, sleepwear, and foundation garments. Step-by-step illustrations demonstrate the basic slopers and show how to manipulate them into different styles. Advice is given about how to work with the specialty fabrics used in the industry including woven, knit, power stretch, and bias-cut fabrics. Specially commissioned photographs and diagrams are used to showcase construction techniques specific to lingerie including boning, elastic, and lace insertion, and how and where to use the myriad of closures available. A final chapter on embellishment shows how to add unique and personal touches to garments and apply that luxurious finish.
