~~The Colonizer and the Colonized by Albert Memmi~~

In *The Colonizer and the Colonized*, Albert Memmi's essential argument is that the collapse of colonialism is inevitable. According to Memmi, there are only two answers for the colonized to disrupt the system of oppression. The two possible "solutions" are assimilation and revolt. In response to the marginalization of the colonized, both answers carry a high price.

Before and during the revolt, the colonized always considers the colonizer as a model or as an antithesis. He continues to struggle against him. He was torn between what he was and what he wanted to be, and now he is making of himself.

Memmi's 1957 book, *The Colonizer and the Colonized* (part of which has also been published under the title, *Portrait of the Colonizer*), is one of the foundational texts of postcolonial theory. Memmi wrote it in response to the decolonization of North Africa in 1956, when Tunisia and Algeria gained independence from the French.

~~Memmi, Albert — Postcolonial Studies~~

To observe the life of the colonizer and the colonized is to discover rapidly that the daily humiliation of the colonized, his objective subjugation, are not merely economic. Even the poorest colonizer thought himself to be--and actually was--superior to the colonized. This too was part of colonial privilege.

Lexicology. The term colonization is
derived from the Latin words colere ("to
cultivate, to till"), colonia ("a landed
estate", "a farm") and colonus ("a tiller of
the soil", "a farmer"), then by extension
"to inhabit". Someone who engages in
colonization, i.e. the agent noun, is
referred to as a colonizer, while the person
who gets colonized, i.e. the object of the

Colonizer or Colonized introduces two colonial stories into the heart of France's literary and cultural history. The first describes elite France's conflicted relationship to the Ancient World. As much as French intellectuals aligned

themselves with the Greco-Romans as an "us," they also resented the Ancients as an imperial "them," haunted by the memory that both the Greeks and Romans had colonized their ancestors, the Gauls. This memory put the elite on the defensive—defending against the legacy of this colonized past and the fear that they were the barbarian other. The second story mirrored the first. Just as the Romans had colonized the Gauls, France would colonize the New World, becoming the "New Rome" by creating a "New France." Borrowing the Roman strategy, the French Church and State developed an assimilationist stance towards the Amerindian "barbarian." This policy provided a foundation for what would become the nation's most basic stance towards the other. However, this version of assimilation, unlike its subsequent ones, encouraged the colonized and the

colonizer to engage in close forms of contact, such as mixed marriages and communities. This book weaves these two different stories together in a triangulated dynamic. It asks the Ancients to step aside to include the New World other into a larger narrative in which elite France carved out their nation's emerging cultural identity in relation to both the New World and the Ancient World.

Over the last two decades, the experiences of colonization and decolonization, once safely relegated to the margins of what occupied students of history and literature, have shifted into the latter's center of attention, in the West as elsewhere. This attention does not restrict itself to the historical dimension of colonization and decolonization, but also focuses upon their

impact upon the present, for both colonizers and colonized. The nearly fifty essays here gathered examine how literature, now and in the past, keeps and has kept alive the experiences - both individual and collective - of colonization and decolonization. The contributors to this volume hail from the four corners of the earth, East and West, North and South. The authors discussed range from international luminaries past and present such as Aphra Behn, Racine, Blaise Cendrars, Salman Rushdie, Graham Greene, Derek Walcott, Guimarães Rosa, J.M. Coetzee, André Brink, and Assia Djebar, to less known but certainly not lesser authors like Gioconda Belli, René Depestre, Amadou Koné, Elisa Chimenti, Sapho, Arthur Nortje, Es'kia Mphahlele, Mark Behr, Viktor Paskov, Evelyn Wilwert, and Leïla Houari. Issues addressed include the role of travel writing

in forging images of foreign lands for domestic consumption, the reception and translation of Western classics in the East, the impact of contemporary Chinese cinema upon both native and Western audiences, and the use of Western generic novel conventions in modern Egyptian literature.

Memmi examines the manifold causes of the failure of decolonization efforts throughout the world. As outspoken and controversial as ever, he initiates a much-needed discussion of the ex-colonized and refuses to idealize those who are too often painted as hapless victims.

in France in 1955, profoundly influenced the generation of scholars and activists at the forefront of liberation struggles in Africa, Latin America, and the Caribbean. Nearly twenty years later, when published for the first time in English, *Discourse on Colonialism* inspired a new generation engaged in the Civil Rights, Black Power, and anti-war movements and has sold more than 75,000 copies to date. Aimé Césaire eloquently describes the brutal impact of capitalism and colonialism on both the colonizer and colonized, exposing the contradictions and hypocrisy implicit in western notions of "progress" and "civilization" upon encountering the "savage," "uncultured," or "primitive." Here, Césaire reaffirms African values, identity, and culture, and their relevance, reminding us that "the relationship between consciousness and reality are extremely complex. . . . It is equally

A prizewinning historian's epic account of the scramble to control equatorial Africa
In just three decades at the end of the nineteenth century, the heart of Africa was utterly transformed. Virtually closed to outsiders for centuries, by the early 1900s the rainforest of the Congo River basin was one of the most brutally exploited places on earth. In Land of Tears, historian Robert Harms reconstructs the chaotic

process by which this happened.

Beginning in the 1870s, traders, explorers, and empire builders from Arabia, Europe, and America moved rapidly into the region, where they pioneered a deadly trade in ivory and rubber for Western markets and in enslaved labor for the Indian Ocean rim. Imperial conquest followed close behind. Ranging from remote African villages to European diplomatic meetings to Connecticut piano-key factories, *Land of Tears* reveals how equatorial Africa became fully, fatefully, and tragically enmeshed within our global world.
