months later, he delivered a lecture that will now be available in book form for generations to come. In it, he reflects on his life and experience with literature, giving readers a rare and intimate look at an American icon. From being inspired by Buddy Holly to the novels that helped shape his own approach to writing (*The Odyssey*, *Moby Dick*, and *All Quiet on the Western Front*), this is Dylan like you've never seen him before.

The Nobel Lecture in Literature, delivered by Kazuo Ishiguro (*The Remains of the Day* and *When We Were Orphans*) at the Swedish Academy in Stockholm, Sweden, on December 7, 2017, in an elegant, clothbound edition. In their announcement of the 2017 Nobel Prize in Literature, the Swedish Academy recognized the emotional force of Kazuo Ishiguro's fiction and his mastery at uncovering our illusory sense of connection with the world. In the eloquent and candid lecture he delivered upon accepting the award, Ishiguro reflects on the way he was shaped by his upbringing, and on the turning points in his career—"small scruffy moments . . . quiet, private sparks of revelation"—that made him the writer he is today. With the same generous humanity that has graced his novels, Ishiguro here looks beyond himself, to the world that new generations of writers are taking on, and what it will mean—what it will demand of us—to make certain that literature remains not just alive, but essential. An enduring work on writing and becoming a writer, by one of the most accomplished novelists of our generation.

This is a collection in which meditations on imagination and the process of writing mingle with keen discussions of global affairs, geography and colonialism, cultural change, and the deeply lasting influences of the past.

I am very happy to accept the translators' invitation to write a few lines of introduction to this book. Of course, there is little need to explain the author. Pauli's first famous work, his article on the theory of relativity in the *Encyklopädie der Mathematischen Wissenschaften* was written at the age of twenty. He afterwards took part in the development of atomic physics from the still essentially classical picture of Bohr's early work to the true quantum mechanics. Thereafter, some of his work concerned the treatment of problems in the framework of the new theory, especially his paper on the hydrogen atom following the matrix method without recourse to Schrodinger's analytic form of the theory. His greatest achievement, the exclusion principle, generally known today under his own name as the Pauli principle, that governs the quantum theory of all problems including more than one electron, preceded the basic work of Heisenberg and Schrodinger, and brought him the Nobel prize. It includes the mathematical treatment of the spin by means of the now so well known Pauli matrices. In 1929, in a paper with Heisenberg, he laid the foundation of quantum electrodynamics and, in doing so, to the whole theory of quantized wave fields which was to become the *via regia* of access to elementary particle physics, since here for the first time processes of generation and annihilation of particles could be described for the case of the photons.

On December 7, 2010, Mario Vargas Llosa was awarded the Nobel Prize in Literature. His Nobel Lecture is a resounding tribute to fiction's power to inspire readers to greater ambition, to dissent, and to political action. "We would be worse than we are without the good books we have read, more conformist, not as restless, more submissive, and the critical spirit, the engine of progress, would not even exist," Vargas Llosa writes. "Like writing, reading is a protest against the insufficiencies of life. When we look in fiction for what is missing in life, we are saying, with no need to say it or even to know it, that life as it is does not satisfy our thirst for the absolute—the foundation of the human condition—and should be better." Vargas Llosa's lecture is a powerful argument for the necessity of literature in our lives today.

For, as he eloquently writes, "literature not only submerges us in the dream of beauty and happiness but alerts us to every kind of oppression."
