Whatever happens on the visible plane has its roots in invisible dimensions; reality is more than meets the eye. This is the essence of all spiritual teachings and mystery schools, and it is the key to understanding what actually happens on the stage of the global power game. Here, in a unique compendium, you get to know what the world looks like when seen from this paranormal viewpoint. Step by step, the author unfolds stunning insights into the hidden dimensions of secret politics, money manipulations, and the ongoing transformation. The pieces are put together to reveal an exciting puzzle. Topics include: Ancient knowledge and new revelations The conclusive meaning of the symbolism of light and darkness The ideology of the Illuminati The roots and goals of today's secret societies Prophecies regarding money and the crash Alien forces and the presence of lightbeings Our role in this cosmic drama ?Had Armin Risi lived in classical times, he would now be counted among the great philosophers and theologians. Being a contemporary author, however, he is able to go beyond classical philosophy and shed light on problems, coverups, and challenges of today, using a revolutionary logic, or mytho-logic, as he calls it. ? Professor Jorg Rehberg, Zurich

Following the first two books of the "Christina" book series, both of which became bestsellers, the third book is now available. The first two books told the beginning of Christina's story: the extraordinary circumstances of her birth, her childhood and youth, and the beginning of her work in public up until spring 2018.The third book consists exclusively of Christina's own words, compiled from her seminars and interviews in 2018 and 2019. Christina tells us who we human beings really are, why conditions on Earth today are as they are, and which positive direction global development can take. She gives us confidence and hope for a future of inner and outer peace, and nourishes our feeling that, despite all the gloomy predictions, all will be well in the end.Further topics in Book 3 are: individual increase in vibration; purification of the soul; our body being and cell communication; our spiritual team; the great game of forgetting; karma and creative power; a school for heart-based learning; trust in your own heart feeling; the evolution of love; spiritual networking; childlike joie de vivre and playfulness.

This brilliant new book by one of Europe's leading social thinkers throws light on the global power games being played out between global business, nation states and movements rooted in civil society. Beck offers an illuminating account of the changing nature of power in the global age and assesses the influence of the ever-expanding counter-powers. The author puts forward the provocative thesis that in an age of global crises and risks, a politics of "golden handcuffs" - the creation of a dense network of transnational interdependencies - is exactly what is needed in order to regain national autonomy, not least in relation to a highly mobile world economy. It is imperative that the maxim of nation-based realpolitik - that national interests have necessarily to be pursued by national means - be replaced by the maxim of cosmopolitan realpolitik. The more cosmopolitan our political structures and activities, Beck suggests, the more successful they will be in promoting national interests, and the greater our individual power in this global age will be.

A tour through the new science of the Omniverse, its spiritual and physical dimensions, and its incalculable intelligent civilizations • Reveals the key travel and communication technologies of the Omniverse: time travel, teleportation, and telepathy • Unveils newly disclosed state secrets about these technologies, about the findings of the NASA Mars rover missions, and about a secret colony and life on Mars • Explains through science how souls are holographic fragments of God and how they help create planets, solar systems, galaxies, and universes in the multiverse We are all citizens of the Omniverse, the overarching matrix of energy, spirit, and intelligence that encompasses all that exists: all universes within the multiverse as well as the spiritual dimensions centered on the divine Source that many call God. In this scientific guide to the Omniverse, Alfred Lambremont Webre reveals startling replicable evidence about extraterrestrial and extra-universal life, the intelligent civilizations created by souls in the afterlife, top-secret alien technology, and the existence of a secret base as well as life on Mars. The author explains how our souls are holographic fragments of God/Source and how souls and Source are co-creating planets and galaxies as virtual realities for soul development. He addresses Grey alien control over soul reincarnation and also sheds light on the presence of invisible hyperdimensional controllers known as the Archons, who feed off negative energy. Revealing the key technologies of the Omniverse, the author explains how hyperdimensional civilizations communicate telepathically, teleport interdimensionally, and travel through time. He unveils newly disclosed state secrets about government possession of these technologies, the findings of the NASA Mars rover missions, and the secret Mars colony whose permanent security personnel is age-reversed and shot back through time to their specific space-time origin points—with their memories blocked. Integrating science and spiritually, this map of the dimensions of the Omniverse sounds the call for scientific inquiry into the holographic origins of the soul, the potential of time travel, and our role as divine co-creators with Source.

The second book continues the story again from the perspective of her mother, Bernadette of Christinas development: the end of her school days, the revelation of her life plan and the impressive start of her work in public.Further topics in Book 2 are: the universal rules of life; how to follow our individual soul path and unfold our personal potential; support from our spiritual companions; practical tips for increasing individual and collective vibration frequency; the silent revolution of unconditional love; the importance of grounding for time-change people; the essential link between lateral thinking and spirituality; holistic science and positive technology; four possible consciousness orientation choices: the five-dimensional future of humanity on earth and the approaching golden age.I am here to help human beings to reach a state of expanded consciousness. With an expanded horizon, they will be able to see what is not working properly on this planet today for themselves. Then they can develop new solutions and perspectives in every area of life that will be successful in the long term. But human beings have free will. The decision is theirs alone. (Christina von Dreien)We are all equal in our innermost core. No one is more advanced than anyone else, no light is brighter than any other, and no task in life is more important than any other. We are all divine beings who are experiencing being human, and not human beings who are becoming divine. (Christina von Dreien)

What does it take to be a professional singer in today's technological world? Why do singers with less technical skill sometimes out-perform stars? What is that mysterious factor that makes an electric performance? This collaboration between a voice teacher and a performance psychologist teaches skills that work for singers at all levels of ability, experience, and training. 20 music examples.

Offering new and critical insights on global activism and power, it features case studies on China and Tibet, HIV/AIDS, climate change, child labour, the WTO, women and the UN, the global public sphere, world social forums and global civil society.

For Harry Redner, the phrase "beyond civilization" refers to the new and unprecedented condition the world is now entering specifically, the condition commonly known as globalization. Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development. His account begins with the Axial Age (700 300 BC) and proceeds through Modernity (after AD 1500) to the present global condition. What is globalization doing to civilization? In answering this question, Redner studies the role played by capitalism, the state, science and technology. He aims to show that they have had a catalytic impact on civilization through their reductive effect on society, culture, and individualism. However, Redner is not content to diagnose the ills of civilization; he also suggests how they might be ameliorated by cultural conservation. Above all, it is to the problem of decline in the higher forms of literacy that he addresses himself, for it is on the culture of the book that previous civilizations were founded. This study will be of interest to sociologists, historians, and social and political theorists. Its style makes it accessible also to general readers, interested in civilization past, present, and future.

There is no recent literature that underscores the transition from Pan-Africanism to Diaspora discourse. This book examines the gradual shift and four major transformations in the study of Pan-Africanism. It offers an "academic post-mortem" that seeks to gauge the extent to which Pan-Africanism overlaps with the study of the African Diaspora and reverse migrations; how Diaspora studies has penetrated various disciplines while Pan-Africanism is located on the periphery of the field. The book argues that the gradual shift from Pan-African discourses has created a new pathway for engaging Pan-African ideology from academic and social perspectives. Also, the book raises questions about the recent political waves that have swept across North Africa and their implications to the study of twenty-first century Pan-African solidarity on the African continent. The ways in which African institutions are attracting and mobilizing returnees and Pan-Africanists with incentives as dual-citizenship for diasporans to support reforms in Africa offers a new alternative approach for exploring Pan-African ideology in the twenty-first century. Returnees are also using these incentives to gain economic and cultural advantage. The book will appeal to policy makers, government institutions, research libraries, undergraduate and graduate students, and scholars from many different disciplines.
