With an innovative integration of visuals, text, and spatial graphics, *Introduction to Contemporary Geography* presents a modular and highly graphical springboard to introductory geography—ideal for contemporary students and learning styles. This innovative new resource partners best-selling human geography author Jim Rubenstein with environmental and physical geographer Bill Renwick, economic/political/cultural geographer Carl Dahlman, and the information architects at Dorling Kindersley (DK). The authors' approachable prose and DK's bold visual style combine to engage students with little to no science background, encouraging them to become scientifically literate and responsible consumers, readers, and voters.

This book constitutes the proceedings of the 14th International Conference on Mobile and Contextual Learning, mLearn 2015, held in a cruise ship leaving from and arriving to Venice, Italy, in October 2015. The 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions. The papers deal with the topics related to the theme of the conference: "The mobile learning voyage: from small ripples to massive open waters". The conference theme paid tribute to the developments that brought mobile learning from its infancy steps in the early 2000s to maturity in 2015, while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning, and emerging ambient technologies.

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.

*Business Organizations, Second Edition* is a pedagogically rich book that recaptures student engagement in the course without sacrificing basic rigor. The traditional coverage of most books in the field is retained, but modernized in reflecting the importance of unincorporated entities and small business counseling problems. Transaction-oriented problems put the student in the practice role of advising a variety of businesses. An expository approach provides clear context for cases. Features include flowcharts, connections boxes, self-testing exercises, an interspersed series of exercises on ethics for business lawyers, a glossary of terms, and sidebars on numerical concepts and skills. Through the use of side-bar explanations or otherwise, the chapters or major sections of chapters in the book stand alone, facilitating teaching in almost any order. An online supplement includes a "business concepts for lawyers" module to be assigned as an instructor desires, as well as a variety of sample documents to show students the actual materials that lawyers work with every day. New to the Second Edition: Major revisions to incorporate important statutory modifications: Book-wide revisions to incorporate 2016 Model Business Corporations Act amendments Book-wide revisions to incorporate amendments to the Revised Uniform Partnership Act and amendments to several other ALI model statutes for unincorporated entities, including the revisions made under the ALI's "harmonization project" Revisions to reflect significant changes in the exemptions from registration under the Securities Act of 1933 Updates to reflect the 2017 Tax Cuts and Jobs Act New cases, including *Alexander v. FedEx* and *O'Connor v. Uber* (dealing with the agency relationship of delivery companies and their drivers); *Browning-Ferris Indus.* (addressing the possibility of joint-employer status in situations involving temp agencies); and *Salman v. U.S.* (new decision of the Supreme Court having to do with insider trading) Newly written substantive materials, including an entirely new section on the "gig" economy, added to Ch. 4; and new material on the ability of shareholders to adopt bylaws affecting the management of business Shorter cases to bring down page length and respond to adopter requests Improved integration of the text and its online companion material Professors and students will benefit from: Modularity—achieved by keeping chapters short and self-contained—so that the book can be adapted to professors' different priorities Substantial material provided for free in an online supplement, to reduce

overall student costs, including: A set of complete edited codes to support all readings in the casebook; and A module comprising a "business concepts for lawyers" guide, covering tax, accounting, financial and economic topics keyed directly to the book. Detailed, problem-focused treatment of unincorporated entity issues and special transactional problems in counseling small businesses Visual and pedagogical elements (including teaching and learning aids such as flow-charts and self-testing devices) that are designed to engage a generation of students and teachers accustomed to variety and visual appeal Special cross-referencing aids to emphasize connections among related topics An expository approach providing clear context for the traditional case material that also appears Easy-to-digest sidebar content intended to develop student numeracy strength in tax, accounting and other relevant concepts

This work adopts a multidisciplinary approach to corporate communication, including management communication, public relations, organizational behavior and change, marketing communication, and advertising. The many-faceted approach adopts the perspective of a practicing communications professional, emphasizes corporate branding, and focuses on an integrated approach to communication.

The field of plant taxonomy has transformed rapidly over the past fifteen years, especially with regard to improvements in cladistic analysis and the use of new molecular data. The second edition of this popular resource reflects these far-reaching and dramatic developments with more than 3,000 new references and many new figures. Synthesizing current research and trends, Plant Taxonomy now provides the most up-to-date overview in relation to monographic, biodiversity, and evolutionary studies, and continues to be an essential resource for students and scholars. This text is divided into two parts: Part 1 explains the principles of taxonomy, including the importance of systematics, characters, concepts of categories, and different approaches to biological classification. Part 2 outlines the different types of data used in plant taxonomic studies with suggestions on their efficacy and modes of presentation and evaluation. This section also lists the equipment and financial resources required for gathering each type of data. References throughout the book illuminate the historical development of taxonomic terminology and philosophy while citations offer further study. Plant Taxonomy is also a personal story of what it means to be a practicing taxonomist and to view these activities within a meaningful conceptual framework. Tod F. Stuessy recalls the progression of his own work and shares his belief that the most creative taxonomy is done by those who have a strong conceptual grasp of their own research.

A resource for students and supervisors alike, the topics covered are related to the management of postgraduate research studies: the development of a successful research proposal (with examples); research resource management; research ethics and more.
