From bestselling author Gabor Mat\u00e9, the essential resource for understanding the roots and behaviors of addiction--now with an added introduction by the author. Based on Gabor Mat\u00e9's two decades of experience as a medical doctor and his groundbreaking work with the severely addicted on Vancouver's skid row, In the Realm of Hungry Ghosts radically reenvisions this much misunderstood field by taking a holistic approach. Dr. Mat\u00e9 presents addiction not as a discrete phenomenon confined to an unfortunate or weak-willed few, but as a continuum that runs throughout (and perhaps underpins) our society; not a medical "condition" distinct from the lives it affects, rather the result of a complex interplay among personal history, emotional, and neurological development, brain chemistry, and the drugs (and behaviors) of addiction. Simplifying a wide array of brain and addiction research findings from around the globe, the book avoids glib self-help remedies, instead promoting a thorough and compassionate self-understanding as the first key to healing and wellness. In the Realm of Hungry Ghosts argues persuasively against contemporary health, social, and criminal justice policies toward addiction and those impacted by it. The mix of personal stories--including the author's candid discussion of his own "high-status" addictive tendencies--and science with positive solutions makes the book equally useful for lay readers and professionals.

This cult classic of gonzo journalism is the best chronicle of drug-soaked, addle-brained, rollicking good times ever committed to the printed page. It is also the tale of a long weekend road trip that has gone down in the annals of American pop culture as one of the strangest journeys ever undertaken. Now a major motion picture from Universal, directed by Terry Gilliam and starring Johnny Depp and Benicio del Toro.

Personality Psychology: Foundations and Findings is an evidence-based text with integrated cultural references and excellent coverage of the key building blocks of the subject matter--namely, the "foundations"(traits, genetics, self and identity, neuroscience, intrapsychic aspects, regulations and motivation, and cognition as it applies to the human personality) and the "findings" (the cutting edge research in each of these areas in which personality psychologists are actively engaged every day).

EARLY EDUCATION CURRICULUM: A CHILD'S CONNECTION TO THE WORLD focuses on the role of observation and assessment in early childhood programming, the process of planning and implementing a curriculum, setting up an inclusive child-centered environment, and the uses of evaluation and documentation for continuous program improvement. Updated with current research and standards, the text continues to present new material on brain research that underlies teaching ideas as well as information on reflective practice, intentional teaching, and using the environment as a teaching tool. The seventh edition includes more material on diversity and diversity strategies, activity plans for different age groups, and more floor plans. New case studies provide examples of how activities planned align with specific standards, and allow students to apply knowledge gained to real-life situations. The book retains its strong applied focus on the how-to's of teaching, with many hands-on teaching tips.
