Pamela Howard's What is Scenography? has become a classic text in contemporary theatre design and performance practice. In this second edition, the author expands on her holistic analysis of scenography as comprising space, text, research, art, performers, directors and spectators, to examine the changing nature of scenography in the twenty-first century. The book includes: case studies and anecdotes from Howard's own celebrated career illustrations of her own recent work, including black and white illustrations throughout and an eight page colour section an updated 'world view' of scenography, with definitions from the world's most famous and influential scenographers A direct and personal response to the question of how to define scenography by one of the world's leading practitioners, What is Scenography? continues to shape the work of visual theatremakers throughout the world.

Scenography – the manipulation and orchestration of the performance environment – is an increasingly popular and key area in performance studies. This book introduces the reader to the purpose, identity and scope of scenography and its theories and concepts. Settings and structures, light, projected images, sound, costumes and props are considered in relation to performing bodies, text, space and the role of the audience. Concentrating on scenographic developments in the twentieth century, the Introduction examines how these continue to evolve in the twenty-first century. Scenographic principles are clearly explained through practical examples and their theoretical context. Although acknowledging the many different ways in which design shapes the creation of scenography, the book is not exclusively concerned with the role of the theatre designer. In order to map out the wider territory and potential of scenography, the theories of pioneering scenographers are discussed alongside the work of directors, writers and visual artists.

Contemporary Scenography investigates scenographic concepts, practices and aesthetics in Germany from 1989 to the present. Facing the end of the political divide, the advent of the digital age and the challenges of globalization, German-based designers and scenographers have reacted in a variety of ways to these shifts in the cultural landscape. The edited volume, a compilation of 12 original chapters written in collaboration with acclaimed scenographers, stage designers and distinguished scholars, offers fresh insights and in-depth analyses of current artistic concepts, discourse and innovation in this multifaceted, dynamic field. The book covers a broad spectrum of scenography, including theatre works by

Katrin Brack, Bert Neumann, Aleksandar Denic, Klaus Grünberg, Vinge/Müller and Rimini Protokoll, in addition to scenography in museums, exhibitions, social spaces and in various urban contexts. Presenting a range of perspectives, the volume explores the interdisciplinarity of contemporary scenography and its ongoing diversification, raising questions relating to cultural heritage, genre and media specificity, knowledge transfer, local versus global practices, internationalization and cultural exchange. Combined with a set of stimulating examples of scenographic design in action – presented through interviews, artists' statements and case studies – the contributors develop a theoretical framework for understanding scenography as an art practice and discourse.

The third edition of Pamela Howard's *What is Scenography?* expands on the author's holistic analysis of scenography as comprising space, text, research, art, performers, directors and spectators, to examine the changing nature of scenography in the twenty-first century. The book includes new investigations of recent production projects from Howard's celebrated career, including *Carmen* and *Charlotte: A Tri-Coloured Play with Music*, full-colour illustrations of her recent work and updated commentary from a wide spectrum of contemporary theatre makers. This book is suitable for students in Scenography and Theatre Design courses, along with theatre professionals.

Theatre and Performance Design: A Reader in Scenography is an essential resource for those interested in the visual composition of performance and related scenographic practices. Theatre and performance studies, cultural theory, fine art, philosophy and the social sciences are brought together in one volume to examine the principle forces that inform understanding of theatre and performance design. The volume is organised thematically in five sections: looking, the experience of seeing space and place the designer: the scenographic bodies in space making meaning This major collection of key writings provides a much needed critical and contextual framework for the analysis of theatre and performance design. By locating this study within the broader field of scenography – the term increasingly used to describe a more integrated reading of performance – this unique anthology recognises the role played by all the elements of production in the creation of meaning. Contributors include Josef Svoboda, Richard Foreman, Roland Barthes, Oscar Schlemmer, Maurice Merleau-Ponty, Richard Schechner, Jonathan Crary, Elizabeth Wilson, Henri Lefebvre, Adolph Appia and Herbert Blau.

Looking Into the Abyss examines the ways in which the visual theatre affects our understanding of the dramatic event. Arnold Aronson opens with an overview of scenographic concepts, including postmodern design and the use of new media in the theatre, and continues with analyses of the work of specific designers (including Richard Foreman and David Rockwell) and scenographic responses to playwrights like Chekhov and Tony Kushner.

Consuming Scenography offers an insight into contemporary scenographic practice beyond the theatre. It explores the ways in which scenography is used to create a global cultural impact and accelerate profits in the site-specific context of themed shopping malls. It analyses the effect of the architectural, aesthetic, spatial, material and sensory aspects of design through their performative encounters with consumers in order to offer a better understanding of performance design. In the first part the author explores the spatial seduction of an enclosed market space and traces the origins of scenographic temporality in permanent architectonic spaces for trade and commerce, from ancient Greek and Roman roofed markets and Oriental bazaars to 19th-century arcades and department stores to modern-day shopping malls. The second section addresses the site-specific theatricality of the shopping mall, considering the use of performative aspects of scenography in the creation of corporate identity. It engages with production and consumption of experience in themed shopping malls, using historical, aesthetical, social and political lenses. In the final section, the author intertwines fluidity of market changes with flexibility of scenographic matter, drawing attention to both contradictions and prospects that merging of scenography and architecture can bring along. Considering a variety of case studies of themed shopping malls, including the Ibn Battuta Mall in Dubai, Terminal 21 in Bangkok, the Villaggio in Doha and Montecasino in Johannesburg, as well as further examples from Europe, USA and Asia – this book provides a wide-ranging critical examination of the ways in which scenographic thinking and practices are exploited in wider cultural contexts for impact, branding, and higher profits.

Play Directing describes the various roles a director plays, from selection and analysis of the play, to working with actors and designers to bring the production to life.
